

POLICE KILL  
SUSPECTED  
AUTO THIEFFails to Answer Summons  
to Halt and is Shot in Gun  
Fight on Ninth Street

Ignoring commands of police to halt and answering their shots with a volley of revolver shots, a man, identified by police as David Yampolsky, alias "Doc Young," was shot and killed late last night by the police department in an attempted attempt to arrest an auto thief.

Identification was made by Lieut. Harlaner of the department, who said that Yampolsky, a Russian, was a well-known auto thief in this city. He was shot in the chest and back, and died shortly after he was taken to the hospital.

Yampolsky was driving a 1924 Ford sedan when he was shot. The car was found abandoned on Ninth street, near the intersection of Broadway.

Veteran Doctor  
Passes Away at  
Hollywood Home

After an illness of more than three years duration Dr. Harry Edward Stroud, 63 years of age, of 1729 Cahanga avenue, Hollywood, died yesterday at the Hollywood home.

Dr. Stroud was born in Birmingham, Eng., and came to this country when he was 15. He was a member of the American Medical Association and the California Medical Association.

He was a well-known physician in Hollywood and had a large practice. He was also a member of the Hollywood Chamber of Commerce and the Hollywood Athletic Club.

PEACE TALK PERMEATES  
BRITISH STRIKE CRISISUnion Chiefs and Cabinet Ministers  
in Conferences Lend Credence  
to Hope of Settlement

A full page of pictures of British strike scenes will be found on page 1.

(BY CABLE AND ASSOCIATED PRESS)

LONDON, May 12.—Prolonged secret discussions at the union headquarters, which lasted until an early hour this morning, simultaneously with a special Cabinet conference held in the House of Commons which was followed by ministerial conversations in Downing street, were taken as indicating that an important peace move was afoot. Consequently there is strong hope in some quarters that the strike will be called off before long.

It is impossible to obtain an authoritative statement on the matter until the union headquarters are opened at noon today. It is evident that the matter is under discussion of great consequence.

It is known that the union leaders are in a state of confusion, and that the government is in a state of confusion. The union leaders are in a state of confusion, and the government is in a state of confusion.

BUILDERS IN  
TACOMA GO  
OPEN SHOPFifty-seven Contractors  
Adopt Plan Unanimously;  
Wage Cut Opposed

(BY A. P. NIGHT WIRE)

TACOMA (Wash.), May 12.—The open shop plan was unanimously adopted here tonight by fifty-seven building contractors and subcontractors. One reservation was made by those who voted, that no attempt to reduce the present standard of wage scales in the various building crafts that are being paid at present would be countenanced by any of the contractors entering the agreement.

A majority of the largest contractors in the city were present at the meeting and expressed themselves as being in favor of the open shop. The majority of the contractors in the city were present at the meeting and expressed themselves as being in favor of the open shop.

NORGE REACHES NORTH POLE  
ON HISTORIC ARCTIC FLIGHTFlags of United States, Norway and Italy Lowered  
at Top of World as Giant Dirigible Pauses on  
Its Way from Spitzbergen to Alaska

BY FREDERICK RAMM  
(BY WIRELESS-EXCLUSIVE DISPATCH)

(Copyright, 1926, by New York Times. All Rights Reserved.)

## ON BOARD THE DIRIGIBLE NORGE AT THE NORTH POLE, May 12.

Three flags—the Stars and Stripes of the United States, the flag of Norway, and the flag of Italy—were placed upon the North Pole at 1 a. m. (Norwegian time,) today, when the dirigible Norge of the Amundsen-Ellsworth-Nobile expedition paused at the exact top of the world on her flight from Spitzbergen to Alaska. It was the supreme moment of the flight, and every member of the crew was tense as Lieut. Riiser-Larsen, after carefully checking his instruments and observations, announced that we were over the pole. The Norge descended with speed reduced and the flags were lowered over icy wastes whose edges gleamed like gold in the pale sunlight, breaking through the fog which surrounded us. Roald Amundsen first lowered the Norwegian flag, then Ellsworth the Stars and Stripes, finally, Nobile, the Italian flag.

NORGE TAKES OFF UNDER  
FINE WEATHER CONDITIONS

(BY CABLE-EXCLUSIVE DISPATCH)

KINGS BAY (Spitzbergen), May 11.—At 9 o'clock this morning, Greenwich time, or 5 a. m. New York time, the Norge of the Amundsen-Ellsworth-Nobile expedition started for Point Barrow, Alaska.

Straight into the midnight sun, a tiny speck soon lost in the golden glow of the North, the dirigible disappeared on her journey across the pole into the unknown wilderness of the Arctic.

## LOG OF THE NORGE

The following messages from Frederick Ramm on board the Norge were sent by the powerful Marconi transmitting set on the dirigible. The set, which operates on a wave length of 500 to 1500 meters and a power of 200 watts, has a range of 1000 to 2000 miles. The messages were picked up by stations on or near the coast of Norway, relayed to Oslo by wire and there retransmitted by wireless to Stavanger, and thence by radio to New York.

## ON BOARD THE DIRIGIBLE NORGE, KING'S BAY

(Spitzbergen), May 11.—The airship Norge, carrying the Amundsen-Ellsworth-Nobile expedition on the flight across the pole to Point Barrow, Alaska, started today at 10 a. m. Norwegian time (9 a. m. Greenwich time, 5 a. m. New York time.)

## ON BOARD THE DIRIGIBLE NORGE, FLYING

POLEWARD, May 11, 2 p. m. Norwegian time, 1 p. m. Greenwich time, 9 a. m. New York time.—We are now in Lat. 82.30, Long. 9 deg. E. Our altitude is 560 meters (1836 feet.) The temperature is minus 9 deg. C. The weather stays clear with a light southeasterly breeze. The air pressure is 740.

In the ice some lanes are covered with new ice. All the time we have used the left and back motors. Lieut. Riiser-Larsen has been navigating, assisted by Capt. Gottwaldt. Ellsworth has been measuring the atmospheric electricity. Our better speed is due to our new altitude, where the conditions are more favorable.

We have now lost all sight of land and the ice changes the whole aspect. We see several great polar bears and can discern white fish in the small openings in the ice. One meteorological report from the Stavanger radio promises that fine weather will continue on the other side of the pole.

All of us are naturally in the highest spirits. We are now eating our first meal and discussing how to celebrate Ellsworth's forty-sixth birthday tomorrow.

## ON BOARD THE DIRIGIBLE NORGE, FLYING

POLEWARD, May 11, 5:15 p. m. Norwegian time, 4:15 Greenwich time, 12:15 New York time.—We are now in Lat. 85 deg. N., Long. 10 deg. E. and heading directly north at a speed of 87 kilometers and a height of 410 meters. A gentle south wind is blowing and the weather is clear. The temperature is minus 12 deg. C. and the barometer stands at 727 millimeters.

We have flown over the ice a long time. Despite our great height we can clearly see how the ice is cracking and screwing. The low temperature has as yet had no effect on us. The whole view of this desert of ice is indescribable and most beautiful.

## ON BOARD THE DIRIGIBLE NORGE, FLYING

POLEWARD, May 11, 6:30 p. m. Norwegian time.—We are now in Lat. 86 deg. N., Long. 10 deg. E. Our course is due north and our speed is 92 kilometers (57 miles) an hour. A light south-southwest breeze is blowing and the skies are entirely clear. The temperature is minus 1 deg. C. (9 deg. above zero F.) and the barometer stands at 727 millimeters.

Weather reports which are constantly being received continue to be favorable. The left engine has been stopped and the right set going. All are well.

## ON BOARD THE DIRIGIBLE NORGE, FLYING

POLEWARD, May 11, at 9:20 p. m. Norwegian time.—At this hour the ship is at Lat. 87 deg. N., Long. 10 deg. E. Direction north. Speed 67 kilometers per hour, 460 meters above ice. Slight breeze southeast. Weather clear and temperature minus 12 deg. C. Barometer 736 millimeters. Headwind we encountered due to high-pressure zone where Norge is now navigating. Possibly better when further ahead. On basis present speed should make pole in four hours. All well.

ON BOARD DIRIGIBLE NORGE, May 11, at 9:40 p. m.—We are at Lat. 88 deg. N., Long. 10 deg. E. Direction north. Speed 67 kilometers; 400 meters above ice. Southwest wind. Scattered clouds. Temperature minus 12 deg. C. Barometer 741 millimeters. Have tried to find level where less headwinds; tried as low as 170 meters where wind is stronger. Sun breaks through gentle clouds. Thus visibility is still good. All well.

## ON BOARD DIRIGIBLE NORGE, May 11, 11:25 p. m.

Norwegian time.—Lat. 88.30 deg. N. Direction north. Speed 60 kilometers. Height 800 meters. Gentle wind. Temperature minus 12 deg. C. Barometer 709. Longitude and other details unknown owing to fog. All well.

## ON BOARD DIRIGIBLE NORGE, May 12, 12:01 a. m.

Norwegian time.—Lat. 89 deg. N., Long. 11 deg. E. Direction north. Speed 60 kilometers. Height 720 meters. Light southeasterly breeze. Foggy. Temperature minus 12 deg. C. Barometer 715. These observations possible by catching short glimpses through banks of fogs. Beginning to notice the cold. All well.

## ON BOARD DIRIGIBLE NORGE, May 12, 12:01 a. m.

Norwegian time.—Lat. 89 deg. N., Long. 11 deg. E. Direction north. Speed 60 kilometers. Height 720 meters. Light southeasterly breeze. Foggy. Temperature minus 12 deg. C. Barometer 715. These observations possible by catching short glimpses through banks of fogs. Beginning to notice the cold. All well.

## ON BOARD DIRIGIBLE NORGE, May 12, 12:01 a. m.

# Norge Well Prepared for Emergencies if Forced to Descend

## TWO MONTHS' PROVISIONS CARRIED ON DIRIGIBLE

**Parachutes, Special Clothing and Firearms Ready for Quick Use; Four Light Sleds Aboard**

(BY CABLE-EXCLUSIVE DISPATCH)

SPITZBERGEN, May 11.—Although Capt. Amundsen and Lincoln Ellsworth are confident that with good weather and no unusual winds or fog they will be able to reach the North Pole and then steer a course for Alaska, they have not neglected to prepare for being forced down on the ice. Indeed, all the equipment for this expedition has been planned with a twofold purpose, to keep them warm in the air and to enable them to proceed with some assurance of safety if they are forced to descend before they reach Alaska.

The many years Amundsen has spent in the Arctic and Antarctic have been of infinite value in this respect, for he knows the minimum of clothing, supplies and equipment that the members of the expedition will need. The clothing has been prepared with special regard to the double need of the members of the expedition. Special flying suits have been provided, with a new kind of opium, the pull sort, which is so popular on tobacco pouches and overcoats. This is to enable the men to get in and out of their suits quickly and without a reach instruments in their inner pockets without delay.

Their first layer of clothing is a heavy suit of woolen underwear. Over this is an overall of silk to keep out the wind and over this the flying suit, lined with fur. Their feet are protected by two pairs of heavy woolen socks. On the ship they wear low shoes with rubber soles to prevent sparks in climbing about the keel, but if they are forced to take to the ice, they will put on high boots of waterproof and soft leather, similar to those used by all Arctic explorers.

**PLENTY OF PROVISIONS**  
On the ship are provisions for two months for every man, consisting of pemmican (chopped meat and fat, dried so that it will not spoil), pemmican and biscuits, as well as milled milk tablets. This is the same food which Amundsen has used for years on his North and South Pole expeditions, and it has been found that a man can live on a few ounces of it a day without becoming weak, although he will lose a lot of weight. And none of the members of the expedition are fat, although several are men of great physique and large frames.

Four light Arctic sleds are stowed away in the keel of the ship, for use if the expedition takes to the ice, and four light tents of waterproof silk have been taken to provide shelter from the wind and enable them to avoid the labor of making snow houses every time they camp. Sleds are carried by the Norwegians, and snowshoes are provided for Lincoln Ellsworth and the Italian members of the crew. Parachutes are also carried, so that if it is found impossible to land the ship at Alaska because of wind, or because a descent is necessary far from a settlement large enough to supply men with supplies. This would leave them rather short of food, but they will take their rifles with them, and if they come down near the coast of Alaska or Siberia, they should be able to find enough game to sustain them until they reach a settlement.

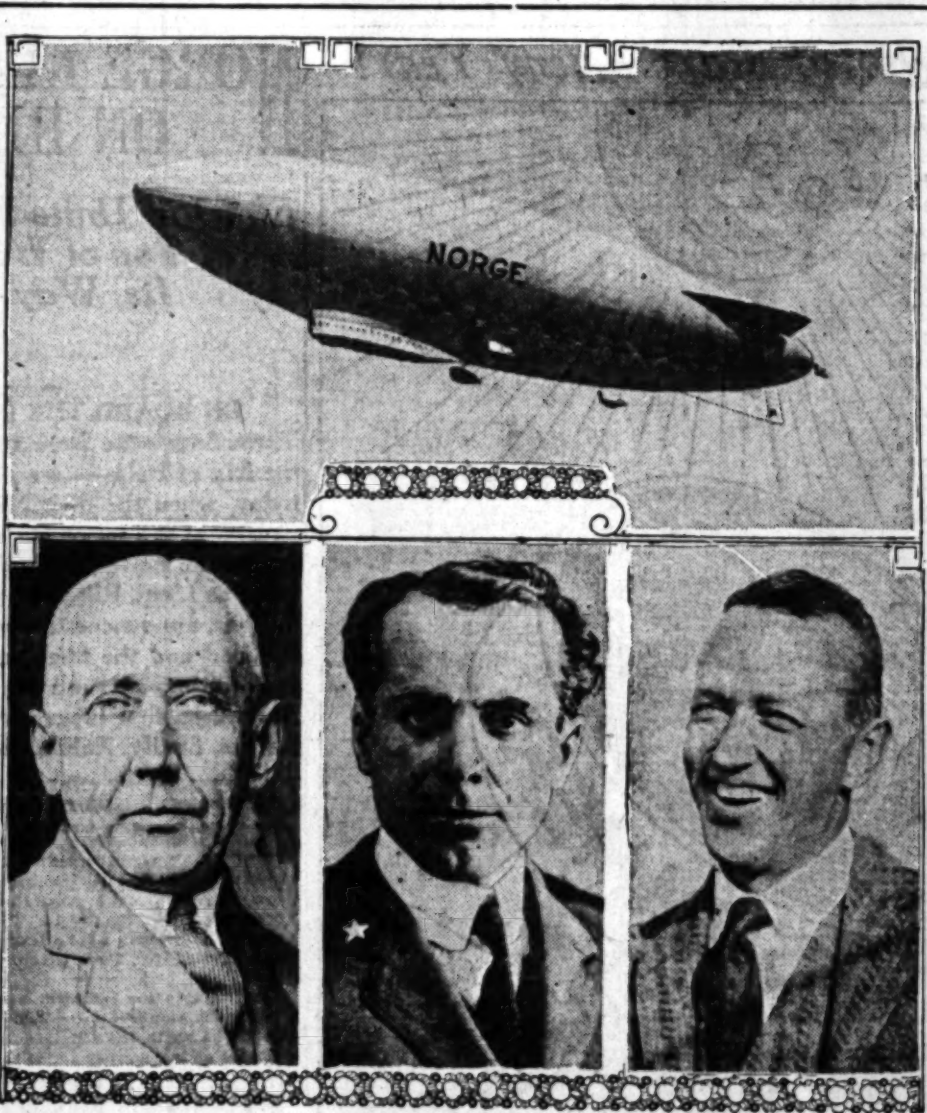

**IN PERFECT CONDITION**  
When the Norge slowly lifted her great bulk from the hands of the land crew and headed toward the northern wilderness of ice she was in as perfect condition as men could put her. With the experience gained on the hard journey over Europe they had overhauled her, made infinite adjustments, tuned up the motors and perfected her condition with the most perfect flight across the polar wastes between Spitzbergen and Alaska.

Up to the most recent men went over the huge skeleton of the ship again and again, checked over the stores to make sure that everything was forgotten and that nothing useless was taken.

They checked up their instru-

## HUGE BIRD OF THE AIR FLYING OVER POLE

This is the latest picture of the Norge, the Amundsen-Ellsworth dirigible which is well along on its flight from Spitzbergen over the Pole to Point Barrow, Alaska. Below are shown the three principals of the expedition. From left to right they are Capt. Amundsen, Col. Nobile, designer of the airship, and Lincoln Ellsworth. The map shows the route to be followed by the party, in their trip over the top of the world. They have Point Barrow as their first objective, but hope their fuel supply will carry them to Nome where landing facilities are much better.

The height at which he is to keep the ship is indicated by a barometer. It is a question of height is one of great importance, because when an unfavorable wind is encountered the pilot, by lifting or dropping the ship, may find a level at which the wind is more favorable or at least not so strong.

**GAS CONTENT SAFEGUARDED**  
Directly in back of the man in charge of the elevators are a number of glass tubes set in brackets, connected by rubber tubing to the balloons above the tubes. In two parts, consisting of inner and outer glass tubes, which by means of indicators show the amount of gas in the balloons. The pressure of the air in the interior air tunnel, which keeps the balloons inflated, is directed to their utmost.

By means of the tubes, the pilot knows at all times what is going on inside the 350-foot gas bag, and may regulate and equalize the balloons to suit the conditions.

The ropes operating the gas valves at the top of the ship are hooked to the tubes. There are four of these ropes, each one operating the valves on two balloons. The ropes are made of steel, and are made to be strong enough to hold the balloons in the air, although the ship may be greatly lifted or lowered by the ropes.

**CHART TABLE FOR STRATEGY**  
The next compartment to the rear is the largest. Here is the chart table, where the observations will be worked out, and where the meteorologist will calculate the course to take to find the most favorable winds and at what height the best conditions will be encountered.

If a storm comes up, or is seen approaching, to calculate the best way in which to meet it, for, if the ship is usually travel in circles, what might be an obstacle might be turned to advantage by skill and maneuvering. As for the observations, they will be so many and varied that considerable mathematical work will be done on that table and the expedition is fortunate in having not only several skillful navigators, but also an expert mathematician in the person of Commander Berger Gottwald, a wireless expert of the Norwegian navy.

The sides of this compartment, as of all the others, are of glass and are held in place by the floor, or deck. The doors by which the ship is entered are also here.

And sticking out from each side are large globular windows, like those on the deck of Capt. Nobile's famous submarine, so that no matter what the weather, no matter how cold it is or what wind is blowing, those inside may look down from the ship in a perpendicular line.

At the right side of the compartment are two airplane compasses, which look something like speedometers. It is in this compartment also that the greatest amount of stores is packed, and in which the men can make about three feet down, for it is difficult to find space to stretch out at full length on the Norge. Men will sleep only when they can no longer stay awake.

The next compartment is given up almost entirely to the wireless sets, except for a tiny aisle along the side leading to the steel ladder that goes up into the keel. The sets are erected in an amazingly

## NORGE PASSING OVER POLAR ICE

Steady Progress Reported by Amundsen

Airship Heads for Alaska Via North Pole

Trip Expected to Consume Sixty Hours

(Continued from First Page)

Lieut. Riser-Larsen and Col. Nobile went aboard the Chantier for dinner at the invitation of Commander Byrd and celebrated the American explorer's flight to the Pole and back as well as their own departure. Commander Byrd gave them information as to compass variations at the Pole and advice on navigation problems they will face in the unknown area. At the end of the dinner Commander Byrd grasped Capt. Amundsen by the shoulders and gave his good wishes.

After the dinner all went ashore and as they stood grouped around the Josephine Ford, the first plane to fly to the pole, Commander Byrd presented to Capt. Amundsen and Mr. Ellsworth a sun compass, a bubble sextant, a drift indicator, polar trousers, charts showing the variations discovered at the pole and other souvenirs.

**RIVALS EXCHANGE GIFTS**  
Capt. Amundsen presented to Commander Byrd a match box he had carried to the South Pole with an inscription, "To the great adventure." Capt. Amundsen gave to Floyd Bennett a hunting knife with a walrus handle and a compass. It was an occasion for mutual generosity, friendliness and congratulations by men engaged in the most daring feat attempted since Andre cut away his Arctic balloon.

All then went to the house occupied by Capt. Amundsen and Ellsworth, where they exchanged further compliments. Capt. Amundsen, Ellsworth and Col. Nobile began their final packing and in a few hours all went to the hangar where they climbed aboard the Norge. All those who could crowd into the hangar gathered about, shaking hands and wishing a successful voyage.

Many hands then manned the ropes attached to the dirigible and with shouts walked toward the hangar in the light of the midday sun. Mount Zeppelin smiled down on the scene and the other peaks were bathed in the soft yellow light making a beautiful picture.

Everything was rich with color except the sky which was pale blue from the reflection of the white snow beneath.

When the Norge was clear 100 motors started and purred with the soft sound of idling low speed machines, working smoothly. Her nose was pointed to the north. When the ropes were let go she rose slowly to a height of several hundred feet. Below her the crowd waved their hands and the ship her motors were heard to roar as she drove out through the fjord.

**PLANE AS CONVOY**  
As she started, the big blue Fokker, carrying Commander Byrd, Floyd Bennett, Lieut. Riser-Larsen and the correspondents roared into action. Flying down the slope, where a few hours before she had started on her great adventure, the Josephine Ford leaped quickly into the air with her light engine. She circled the great dirigible and for nearly an hour accompanied her over the mountains toward the open sea.

"Our only problem is the wind," said Col. Nobile, pilot of the Norge just before the start. "We expect none this side of the pole, but we may meet it on the other side, where the conditions are little known. But we have hopes that everything will go well and I am confident that we will reach Alaska easily."

"I do not know whether we will stop at the Pole or not," said Lieut. Riser-Larsen, the giant Viking with calm cool eyes, and the others who have dreamed, planned and worked for this adventure for so many long months.

None knew what was before him or what stories of lost places he might bring back.

**IN DOUBT TO LAST**  
The Norge left the field at 9 o'clock, Greenwich time.

After a hard day's work, most of the crew got some sleep, although a few worked all night. Col. Nobile was unable to decide during the night whether to fly or not. The breeze came briskly off the glaciers stirring the surface of the harbor and whipping the flags, but the pennants on the hangar hung limp, most of the time and frequently it seemed possible that the ship would be able to leave.

The breeze would be a help down the long fjord and the only danger was in getting the airship from the hangar. Col. Nobile refused to take a chance, but when the wind died down about 6 o'clock he gave orders to get the crew together. Soon they were hurrying from every direction to the mess hall for a hasty breakfast.

Amundsen came in out of breath bundled to the ears and Ellsworth, wearing a fur parka which nearly reached his knees, came in looking weary.

It was a warm, springlike morning after a chilly night, which was a disadvantage, as expansion of the ice in the warm sun makes frequent valving necessary, losing valuable lifting power.

**AMUNDSEN HOPES AWAYS NORGE NEWS**  
OSLO (Norway) May 11.—Roald Amundsen, the explorer, and Lincoln Ellsworth, his companion on their unsuccessful attempt to reach the North Pole last year, have primarily to discover land during the flight of their Italian-built dirigible Norge, which began today. Amundsen has pointed out that it is only 2000 miles from Spitzbergen to Alaska, and that the discovery of even a small piece of land near the top of the world would afford an invaluable con-

NEW HOP TO PARIS PLANNED

New Jersey Club Seeks to Finance Nonstop Flight Before June 20 to Beat French Ace

(BY A. P. NIGHT WIRE)

NEWARK (N. J.) May 11.—Announcement was made today by the Aeronautical Club of New Jersey world attempt to make a nonstop airplane flight from Newark to Paris across the Atlantic.

The early start is proposed in an endeavor to beat Rene Fonck, French ace, who is expected to take off from Mitchell Field on that date in an effort to win the Raymond Orteig prize of \$25,000 across the Atlantic for the first nonstop flight from continent to continent.

Lieutenant-Commander Noel Davis, United States Naval Reserve, is preparing extended plans for the flight. "Who knows, perhaps the world tonight," says the pilot, "let us await the new dawn of aviation and victory."

**PIRATE SHIP SEIZED WITH RUM CARGO**  
Liquor Worth Millions on Vessel Near Atlantic City

NEW YORK, May 11.—A cargo of whiskey, rum and other liquors valued at \$1,000,000 was seized today by the U. S. Coast Guard cutter Donetta, anchored near the Atlantic City.

The freighter, used for six months as a rum runner, was seized by the U. S. Coast Guard cutter Donetta, anchored near the Atlantic City. The ship was carrying a cargo of whiskey, rum and other liquors valued at \$1,000,000.

**AMUNDSEN CONFIDENT**  
The Norge which was originally the U. S. Navy dirigible, was turned out at the State Airship factory at Rome under the command of Commander Byrd. It is equipped completely as a passenger carrier and is fitted with the latest control and passenger car mounted well forward. There is accommodation for twenty passengers in this car.

The ship is 348 feet long with a maximum height of 28 feet, 4 inches, and a maximum width of 44 feet. Her maximum speed is 100 miles an hour. Her useful cargo capacity is eight tons. She is inflated with hydrogen.

The Italian government is keenly interested in the flight and it is through the Italian aviation service, was turned out at the State Airship factory at Rome under the command of Commander Byrd. It is equipped completely as a passenger carrier and is fitted with the latest control and passenger car mounted well forward.

**WEATHER CONDITION IDEAL FOR DIRIGIBLE**  
WASHINGTON, May 11.—Ideal weather conditions for a transpolar flight are prevailing in the Arctic, according to the Weather Bureau.

Abnormally high pressure is reported from both Finland and Alaska. This indicates that cold weather, with little wind, will prevail along the line of flight of the Norge, although less favorable conditions may occur near the pole.

**WILKINS WAITS FOR FOGS TO CLEAR**  
DETROIT, May 11.—Capt. Wilkins, commander of the Detroit, is waiting to make his thrust out over the unexplored Arctic ice north of Point Barrow.

Four weather balloons held up the three-motored monoplane Detroit since her arrival at Barrow, Alaska. The plane is loaded with 600 gallons of gasoline and is ready to fly as soon as the weather will permit. Although fuel is abundant to insure a flight of at least 500 miles over the ice and return.

It is expected that region Captain Wilkins believes he will be able to determine it after flying 500 miles.

**NOME CONSUL ASKED TO FURNISH LANDING CREW**  
DETROIT (Alaska) May 11.—Telegram received here today by consul from Raoul Amundsen, who left this morning from Kings Bay, Spitzbergen, to fly across Arctic wastes to Alaska via the North Pole, asked Lomen to have 100 men ready to lower the dirigible Norge to the ground at Nome.

Amundsen said he will keep Nome advised by radio as to the time of his arrival here.

Four anchors, known as "dead men," to which a chain cable is attached to hold the dirigible, have been placed around the Nome landing field.

Amundsen said he will deflate the Norge here and ship it to the United States by vessel.

**ITALY EAGERLY AWAYS NORGE NEWS**  
ROME, May 11.—As the Amundsen-Ellsworth polar dirigible Norge was built in Italy, carries the Italian flag along with the Norwegian and American emblems and is piloted by an Italian, Commander Nobile, the court eagerly awaiting news of the progress of the dirigible over the polar wastes.

Data of the Norge's departure from Spitzbergen this afternoon were printed in the Italian papers but did not have time to

# Grimes Downs Cubs to Keep Robins in Lead

## SENATORS BEAT LOWLY BROWNS

St. Louis Stages Rally in Ninth But Loses

Lefty Grove Hangs Up Fourth Victory of Year

Triple With Full Bases Ends Faber in Fourth

(BY A. P. NIGHT WIRE) PHILADELPHIA, May 11.—The Athletics ran their winning streak to eight games today, taking the first in their series with Chicago by a score of 6 to 2.

Lefty Grove hung up his fourth triumph of the season and fanned eleven of the White Sox. Triples by Simmons and Galloway, the latter with the bases full in the fourth, accounted for the five runs that drove Faber from the box.

## KENTUCKY DERBY CANDIDATES TO UNDERGO STIFF WORKOUTS

St. Louis Stages Rally in Ninth But Loses

Lefty Grove Hangs Up Fourth Victory of Year

Triple With Full Bases Ends Faber in Fourth

(BY A. P. NIGHT WIRE) LOUISVILLE (Ky.), May 11.—Kentucky derby colts have two days in which to show their trainers and owners that they are ready for the \$50,000 added race at Churchill Downs Saturday. Between now and the time the entries close Friday, a number of the eligibles will be given stiff workouts against time in an effort to determine whether they are in condition. A few of the doubtful starters will be given races tomorrow and upon their showing depends whether they will get under colors Saturday.

## BOTTOMLEY IN HOME-RUN LEAD

St. Louis Stages Rally in Ninth But Loses

Lefty Grove Hangs Up Fourth Victory of Year

Triple With Full Bases Ends Faber in Fourth

(BY A. P. NIGHT WIRE) CHICAGO, May 11.—Burling Grimes held the Cubs to six scattered hits today while the Robins were bunched blows off Blake and Osborn, which, aided by untimely bobbles, enabled Brooklyn to even the series with Chicago by winning, 6 to 2. One of the hits off Grimes was a circuit drive by Grinnell, Cub first baseman. The score:

## WEDDING GIFT FEEDS BABIES

(EXCLUSIVE DISPATCH)  
EL PASO (Tex.) May 11.—Five hundred dollars' worth of fresh milk for the poor children of the Associated Charities Day Nursery was bought by Miss Birdie Krupp with the check which her father gave her for a wedding present.

Miss Krupp was married recently to Lieut. Hewett of the Eighth Engineers stationed at Fort Bliss. Before her marriage she had been a volunteer worker at the Associated Charities among the poor children of the South Side.

From her experience there she knew that milk was the most needed commodity at the Charities because of the increased demand for it during the summer months. So, when her father gave her his check for her wedding present, she informed it to J. B. Rawlings, secretary of the Associated Charities, who placed a contract for \$500 worth of fresh milk to be delivered daily at the nursery during the summer.

Dead or alive. Citizens here plan to ask Gov. Morley to post a State reward.

Feeling runs high throughout this entire section. Cowboys have left the ranges to join the posse and virtually every able-bodied man in San Miguel county has taken up the man hunt.

SMOKING CO-ED OUSTED  
(BY A. P. NIGHT WIRE)  
GRAND ISLAND (Neb.) May 11. Cigarettes have caused the indefinite suspension of one co-ed of Grand Island College and another has been suspended a week, while several others have been given campus discipline in a drive by school authorities to tighten observance of school rules.

## FINAL EPOCH HIS TRIUMPH

**Trumpets Herald Passing of Janitor "Suicide de Luxe" Amid Splendor After Life of Poverty**

(BY A. P. NIGHT WIRE)  
SAN FRANCISCO, May 11.—Four trumpeters with a silver flourish heralded this afternoon the passing of Theodore Kappel, "suicide de luxe," who ended a life of poverty amid scenes of luxury and beauty.

Kappel, janitor of the Affiliated Colleges for many years, was found Sunday night on the silk-covered and flower-bedecked bed of his little room, lying in an especially constructed mahogany cabinet containing the gas with which he ended his life.

The final act in Kappel's elaborate and costly plan to leave life will be the scattering of his ashes over rose beds on a bright, summer's moonlight. The janitor planned the details of his death for many months, preparing his rooms with velvet and damask hangings, silver plates and candle sticks and tinting the ceiling an azure blue.

"I am happy," he said in a letter. "Life has treated me well and I want to leave in a fitting manner."

Kappel left a long list of bequests to persons participating in his death plans, including \$50 to the cemetery superintendent, who will scatter his ashes; \$25.00 to the janitor; \$25 and the costly hangings to his landlady, and various fees to undertaker's assistants, deputy coroners and drivers of the hearse and mourner's carriage.

Alfred Korth, husband of the woman, is under arrest.

Late Sunday a messenger was sent with sandwiches and coffee for Mrs. Korth. Fearing that narcotics might be smuggled into the jail in this way, officials refused delivery and the messenger boy divided the spoils with his fellow-workers.

Young de Jarlais drank some of the coffee. As he slept late because of his night work, his mother did not attempt to arouse him until late yesterday. He died a few minutes after Mrs. de Jarlais succeeded in waking him.

## FOOD KILLS YOUTH

Coroner Believes Drugs Meant for Woman in Jail Caused Death

(BY A. P. NIGHT WIRE)  
SIoux CITY (Iowa) May 11.—A narcotic in food intended for a woman held in jail on a charge of possessing drugs, but eaten by several messenger boys, probably caused the death of Louis de Jarlais, 16 years of age, Coroner Robbins believes.

Alfred Korth, husband of the woman, is under arrest.

Late Sunday a messenger was sent with sandwiches and coffee for Mrs. Korth. Fearing that narcotics might be smuggled into the jail in this way, officials refused delivery and the messenger boy divided the spoils with his fellow-workers.

## Congratulations B.P.O.E.!

During the stress of business I want to pause and pay tribute to that splendid organization—the Benevolent and Protective Order of Elks—whose magnificent temple is so fittingly dedicated today. Los Angeles may well be proud of this acquisition to her many fine buildings. And the architect is to be congratulated on so splendid an achievement.

To do good to our fellow man is really the finest thing in life. It is great to be a man—strong to think—strong to feel—and strong to lend a helping hand to those less fortunate than ourselves—letting not "your right hand know what your left hand doeth." Kindness—the kindness that helps others to help themselves—is what this old world needs.

And truly Los Angeles is proud to be a part of that vast brotherhood—one million strong—who are doing so worthy a work. To have the strength of a mountain—the gentleness of a woman, and the spirit of a soldier!

Singly and collectively I want to congratulate each and every one—who are part and parcel of this fine benevolent organization. The nation may well be proud to number them among its citizens!

David May

## SIGHT SUCCESS FOR AIR LINES

Rail Men Express Views of Plane Development

Think Period of Perfection in Distant Future

Field of Operation Declared Still in Infancy

NEW YORK, May 11.—Whether the historic day in American transportation, on which Commodore Vanderbilt announced that railroads thenceforth would supplement the water as the principal commerce carriers, will repeat itself soon with a switch from rails to the air was discussed by the Associated Press today by leading American railroad presidents. None saw such a change in the near future. Agnew T. Dixon, president of the Reading company, said: "That aerial transportation will become a factor in the future none will deny. The fact remains, however, that this entire field of operation is in its infancy and will require years of development before it can have a real economic value. I do not believe the development should come from the carriers, but remain in the hands of those who are doing such excellent work in perfecting the airplane and dirigible."

J. M. Davis, president of the Delaware, Lackawanna and Western Railroad, said: "Based upon development thus far it is reasonable to assume that the airplane will always be of circumscribed carrying capacity. The bulk of traffic will always flow via the agency that can handle it, in large units, for only in this manner is it possible to maintain the low freight rates that now prevail."

In view of this, to my mind the possibility of railroads going into airplane development as a supplement to future transportation is very remote."

E. J. Pearson, president of the New York, New Haven and Hartford Railroad, said: "Based on its present stage is limited to only a few passengers or other light loads. It seems apparent that these handicaps will be lessened and the airplane will become more of a factor in transportation."

"The railroads are always in touch with the various changes in transportation methods and naturally give careful thought to the economic possibilities of such developments, but in the present situation development of air service is foreign to that of railroading."

FORESTER APPEALS FOR FIRE CAUTION

SITUATION DECLARED TO BE UNUSUALLY CRITICAL FOR TIME OF YEAR

WASHINGTON, May 11.—Appealing for "an aroused public opinion to insure preparedness in fighting forest fires and demand adequate enforcement of more drastic laws to combat them," E. A. Sherman, assistant chief of the forest service, declared today that the situation is unusually critical for this time of year due to extended drought and winds.

Major fires, which are now under control, but precarious as long as dry weather continues, were reported yesterday to the forest service in these national forests: The Allegheny in Pennsylvania, the Monongahela in West Virginia, the Pisgah in North Carolina and the Hagerman in the Wyoming-South Dakota boundary.

Up to the 1st inst. in the south and east there were 401 fires compared with 775 for the same period last year, burning over about 12,000 acres against 45,000 acres. The western fire season is from mid-June to mid-September, but due to the mild winter and lack of precipitation, it is earlier this year.

Mr. Sherman pointed out that Northern Idaho and Montana having thus far had more forest fires than at any time in the history of the forest service.

CABINET RESIGNS

Belgian King Asks M. Brunet to Form New Government

BRUSSELS (Belgium) May 11.—The Cabinet headed by Prosper Poullet, which went into office June 17, 1925, has resigned.

Dispatches from Brussels yesterday said that M. Brunet, Socialist president of the Chamber of Deputies, had been invited by King Albert to form a new Cabinet. The Cabinet was to be one of "national union," containing five Socialists and Democrats, five Catholics, and two or three Liberals.

The program of the new Cabinet, it was agreed, was to be limited to solution of Belgium's pressing financial problems and was to carry over only until the end of the present session of Parliament.

## METHODIST MISSION AID DRIVE VOTED

Seven Bishops Named to Conduct Church Campaign; Greetings Sent East

WASHINGTON, May 11.—The board of bishops of the Methodist Episcopal Church concluded its semiannual meeting here today after appointing a committee of seven bishops to put on a two-year campaign in the interest of the church's world service program.

The appointment was the result of a week's deliberations on the church's foreign mission problem. Discussion brought out that while the needs in the foreign field have greatly increased, the church's revenue for this and domestic mission work has fallen from nearly \$15,000,000 to \$9,000,000 in a year.

The committee is made up of Bishops Birney of China, Blake of Paris, Miller of Mexico City, Fisher of India, Hughes of Chicago, Nicholson of Detroit and Henderson of Cincinnati.

The board sent a message of greeting to Bishop East of Copenhagen, who is under a three-months' sentence there on a charge of irregularities in soliciting charitable funds.

The board unanimously adopted a resolution thanking the President and Mrs. Coolidge for the reception accorded them at the White House last Saturday.

Spilling of Valuable LIQUOR STOCK BEGUN

INDIANAPOLIS, May 11.—Destruction of the W. P. Squibb whiskey stock, with a bottle valuation of \$200,000, was begun today by Linus P. Meredith, United States Marshal. There are 14,400 quarts of the contraband liquor.

NEW EUROPEAN WAR FORESEEN

Austrian Count Advocates Federation of States

General Revolution Viewed as One Possibility

Bessarabia Termed Fuse to Powder Magazine

BERLIN, May 11.—In launching a campaign for the establishment of a Pan-European federation, the Austrian Count Von Coudenhove-Kalergi writes in the Vossische-Zeitung that "Europe is on the verge of another war."

The war menace, he declares, is greater than in 1914; the present European developments are to be viewed from historical standpoint as the prelude to a new outbreak.

"One day Europe will have placed before her the alternative of war or a general revolution as a counter measure to a new outbreak, and this means the smashing of the present European system."

The Count, who is the son of the late Count Henry Von Coudenhove-Kalergi and a Japanese mother, was born in Tokyo when his father was charge d'affaires of the Austro-Hungarian Legation.

OTES NEW ALSACE

He declares the Western Alsace-Lorraine problem has been permanently solved by the Locarno agreements, but says in its place at least a dozen new Alsace-Lorraines have cropped up in Eastern Europe, which are "located in the volcanic zone responsible for all European wars since 1871."

He contends that at present the main safeguard against war is general poverty, which, however, is not considered insurmountable. He concedes that the League of Nations also represents a certain prophylactic.

The Count points out that the tendency of every European state which is one neighbor of a neighboring state than with its immediate neighbor continues a per-

petual state of tension.

## BABY SURVIVES DOUBLE FALL

Child Only Slightly Hurt in Drop to Ledge, Then Bottom of Well

ST. PAUL (Minn.) May 11.—Eighteen-month-old Thomas Welscher fell thirty feet down an open dry well here today, struck a ledge of concrete, rolled off and fell another twenty feet to the bottom of the shaft and escaped with only a slight scalp wound and a cut on his chin.

A neighbor and the fire department rescued him.

menace to peace. He asserts that Bessarabia represents "the principal fuse of the European powder barrel, involving conflicting policies of Rumania, Russia, France, Great Britain, Germany and Italy."

NOTES MENACE FROM ITALY

Still another menace, he says, threatens from Italy, "the objective of whose avowed imperialism and militarism still is uncertain, whether directed toward Africa, Asia or Europe."

"Today," says Count Von Coudenhove-Kalergi, "any lunatic is capable of involving Europe in another war."

The Count, who long has been a leader in the movement in favor of the organization of a United States of Europe.

THE Count, who is the son of the late Count Henry Von Coudenhove-Kalergi and a Japanese mother, was born in Tokyo when his father was charge d'affaires of the Austro-Hungarian Legation.

## CHRYSLER IMPERIAL

"80" AS FINE AS MONEY CAN BUILD

And Worth All That Fineness Costs

THE IMPERIAL "80" is Walter P. Chrysler's supreme effort—literally a car as fine as money can build.

You know the famous earlier Chrysler achievements—the amazement of their unprecedented performance, their extraordinary strength and durability, their fascinating grace of line and color, their astonishing roadability combined with luxurious roominess and compact construction.

The Imperial "80" is that same genius for originality and constructive forward thinking translated in terms of a larger, faster, more luxurious and more costly car—as fine as money can build.

All we ask is that you drive the Imperial "80". Surely you owe it to yourself to give that consideration to this extraordinary car before you decide to buy any luxurious automobile.

## TIME LIMIT PUT ON SPOONING

(EXCLUSIVE DISPATCH)  
WELLESLEY (Mass.) May 11.—How much spooning can a spooner spoon in an hour, is the chief question in discussion for shiks and fappers at Wellesley all because of a new edit imposed by the election which limits spooning in automobile parties to one hour on any street in the town.  
A spooning patrol has been organized by the police department, and nightly Sgt. William Fleming and Patrolman Timmins patrol the back streets in the police sloop where they check out the spooning parties at the end of an hour.  
Courtng in automobiles anywhere about the town for more than an hour is sure to result in a different kind of courtng at the county seat in Dedham, which begins at 9 o'clock each week-day morning.

The State pardons and paroles system here.  
Many dangerous criminals are said to have left the prison farm at will and it is reported that State's Attorney Rehn is prepared tomorrow and successive days to give evidence of that to the jury. Trips by convicts to Chicago are

said to have been common and some of the men at the honor farm became so bold and brazen that they have passed many lurid night hours in saloons in Joliet and in roadhouses in the surrounding territory. It is said.

Warden Whitman is said to have known these conditions, but his hands have been tied so that he could do nothing to remedy affairs.

PROTESTS IGNORED  
Many of the men sent to the honor farm, which is a project for which Warden Whitman has been noted, were said to have been sent there over his protests. Convicts who had done nothing to deserve the trust and confidence of the warden were ordered sent there despite the fact that many protests were registered with the State Department of Welfare from Springfield.

"Orders from Springfield" have been responsible for the transfer of many dangerous crooks to the honor farm, where they have done practically as they pleased, according to evidence which is said to be partly in State's Attorney Rehn's hands.

The prisoners would leave there early in the evening and stay away overnight, returning only at dawn. In order to keep the officials responsible from getting into trouble over the indiscretions.  
Just what Warden Whitman knows of such conditions is not revealed, but the warden is said to have given an opportunity to tell the jury what he does know some time this week.

A Joliet police captain who has several times had his men pick up convicts who were supposed to be locked up, in local saloons and soft-drink parlors, also may be called to tell of that to the jury.

PARTIES CHARGED  
Road houses where the convicts made their nightly headquarters are known to the State's Attorney. Aside from any other evidence, it is said, the prosecutor has at hand details of parties and drinking bouts held by convicts from the honor farm in which women participated.

Some of the convicts are said to have enjoyed such a degree of freedom that it was impossible for those who became acquainted with conditions to believe they were prisoners at all.

One prisoner who enjoyed a constant measure of freedom is said to have made a great joke out of the haunting "Prisoner's song" and to have stood and sung it frequently in one of the neighboring road houses, where his women companion accompanied him on the piano.

Several escapes are laid at the door of this system, intended by Warden Whitman to reclaim men, but used by officials in control of the situation for political and other purposes.

EXPLANATIONS SOUGHT  
Chauncey Jenkins, head of the State Department of Public Welfare, ranking officer in charge of penitentiaries, and Will Collins, head of the Board of Pardons and Paroles, also have been summoned before the jury. According to present plans they will be called and asked to explain some of the things the warden is expected to tell of.

Several more guards and some prisoners were taken before the jury today. One of these was suspected of having been the convict addressed as "My Dear Pal Red" in a note from another convict who signed himself "Larry." One of the notes was found in the room of Deputy Warden Klein, which the deputy tried with his dying strength, vainly, to destroy before he died.

This note in particular brought in the names of Colvin and Maj. M. A. Moselle, head of the Motor Engineering Corporation in Chicago, which has been termed a pardon mill. It told of "Larry's" dealings with the two toward getting a pardon for "Red."

EXPOSITION TO HAVE  
PORTRAIT GALLERY

GREAT PERSONAGES WILL  
BE DEPICTED AT SESQUICENTENNIAL

(BY A. P. NIGHT WIRE)  
PHILADELPHIA, May 11.—A gallery of portraiture, depicting many of America's greatest personages, is a feature of the Sesqui-centennial Exposition announced by the Pennsylvania Academy of Fine Arts.

The plan provides for the removal of all pictures now on the walls and the entire space devoted to the display of what the academy terms "a gallery of national portraiture."  
The exhibition is intended as "an illustrated history of the century and a half of American independence, and will not fail to show incidentally the rise and progress of the fine arts during that period."

Works to be eligible for the gallery must represent persons who had some part in local, State or national history or done by an artist of ability. Important in the history of American art.

PRISONERS TO WORK  
ON SITE FOR PAGEANT

(EXCLUSIVE DISPATCH)  
TUCSON (Ariz.) May 11.—George Cumberbatch of this city, assistant manager of the Arizona Pageantry Association, has received from Gov. G. W. P. Hunt assurance that labor for preparing the pageant grounds of Casa Grande will be furnished from the State Penitentiary at Florence, a few miles distant. It is proposed to utilize an immense ancient ruin mound as the site of an open-air stadium that will seat about 6000 persons. These seats are to be of rough concrete, colored just as are the old buildings around. The pageant will be held in November for two days before and two days after the State fair.

## SHULER CAUSES CHURCH FURORE

Raises Fundamentalist Topic at Memphis

Proposes Committee to Define Belief

Methodist Conference Head Squelches Debate

(BY A. P. NIGHT WIRE)  
MEMPHIS, May 11.—The twentieth general conference of the Methodist Episcopal Church, South, hurried for a moment on the edge of another fundamentalism-modernism fight here today when a resolution introduced by Rev. R. P. Shuler, Los Angeles, was hurried out of the conference into a committee with an argument already starting.

Mr. Shuler asked the conference to ask the bishops to appoint a special committee to draw up a statement of Methodist belief and present it to the general conference four years hence.

An effort was made to send the resolution to the committee on constitution, another was made to table it and several delegates attempted to discuss the matter of the need of such a committee before it was sent to the committee on the spiritual state of the church.

Bishop U. V. W. Darlington, presiding, squelched any attempt to discuss the subject matter of the resolution.

Dr. R. Parkes Cadman, head of

## PAPER TO DON COLONIAL DRESS

(BY A. P. NIGHT WIRE)

WILLIAMSBURG (Va.) May 11.—The Virginia Gazette, which asserts it was the first newspaper in the United States to publish the Declaration of Independence, on Saturday will depend upon the antiquity rather than the newness of its news. When President Coolidge, the Governors of the original thirteen States, House and Senate delegations and others gather here for the anniversary celebration of the sesquicentennial of the adoption of the Virginia resolutions, the Gazette will make its appearance in Colonial style and will carry the stories it printed 150 years ago on the action that led to the Declaration of Independence.

the Federal Council of Churches of Christ in America, told the conference that the work of the church was to combat "the neopaganism which is creeping in and causing the country to try to dis-miss God with the vote of thanks for past services."

Dr. Cadman referred to a resolution passed by the conference just before he spoke which called upon Congress to strengthen the prohibition law and the enforcement department, declaring that "Protestantism will have to lower her banner if the prohibition law is defeated. Prohibition is the result of the efforts of Protestantism and its defeat would be a defeat for the church of Christ." The conference voted an appropriation of \$24,000 for the establishment of a board of temperance with headquarters in Washington.

This move met with stiff opposition. One member wanted to know if the church was going to establish a "lobbying bureau" in Washington.

Dr. Cadman in bringing the greetings of the Federal Council of Churches, said that Methodism was the "fort of Christ in America." He said that while state and church should forever be separat-

## J. D. Spreckels, Ill at Coronado, Now Recovering

(BY A. P. NIGHT WIRE)

SAN DIEGO, May 11.—After having been seriously, and at times critically ill at his home in Coronado for several weeks, John D. Spreckels, capitalist, today was reported to be on the road to recovery.

He sat up for a time. Members of his family and friends were highly pleased at his improvement.

People of Egypt bought nearly twice as many American automobiles within the last year as in the same period of time before.

## NEW ARMS RACE BRAZILIAN FEAR

Larger League Council Urged  
as Preventive

Spain Renews Demand for  
Permanent Seat

Commission Discusses Plans  
for Reorganization

(BY CABLE AND ASSOCIATED PRESS)  
GENEVA, May 11.—With Geneva's thoughts already directed toward the League of Nations' proposed disarmament conference by the arrival of Hugh S. Gibson, American delegate to the meeting, the disarmament problem was injected into the discussions of the Commission for Reorganization of the League Council today by Dr. Montarroyo, Brazilian delegate, who contended that if only large military powers have the right to be permanent members of the Council, it only encouraged competition in armaments.

Addressing the reorganization commission, Mr. Montarroyo advocated enlargement of the Council both in regard to permanent and nonpermanent members. Championing Brazil's claim to a permanent seat on the Council, he insisted the League's covenant did not limit permanent members to the so-called great powers and that the term "big powers" meant great military powers, then a premium was being placed on increase in armaments, since the intermediate nations would be incited to strengthen themselves in a military sense in order to be eligible to a perpetual place on the Council. "It will mean an arms race worse than that of 1914 and will imperil the disarmament conference," he declared.

**CONCILIATION DETECTED**  
Vigorous as was the Brazilian's argument, however, some League circles found it conciliatory in one sense, because he admitted the necessity of immediate solution of the League crisis and practically committed Brazil to acceptance of a system whereby all members of the Council would be elected by the League Assembly. Nevertheless, such an idea seems to have little chance of adoption and the trend of the discussions is in the direction of keeping the permanent memberships in the hands of the great powers, without election and without any addition beyond that of Germany.

The general discussion was completed today, with Spain also insisting upon a permanent seat. The commission then attacked the details of reorganization by beginning discussion of the proposal in-

## PREMIER INVOLVED IN PLOT

Defendant Springs Sensation at Counterfeit Trial  
Conducted at Budapest

(BY CABLE—EXCLUSIVE DISPATCH)  
VIENNA, May 11.—The first sensation in the frano counterfeit trial at Budapest broke like a bomb explosion today when a defendant, Desider Raba, private secretary to Prince Ludwig Windisch Grastech, told the court that Premier Bethlen had foreknowledge of the counterfeit plan. Moreover, Raba intimated, the plan for the financial conquest of the lost Hungarian provinces by counterfeit frano notes emanated from the Premier's intimate circle. Raba declared Prince Ludwig disclosed to him the counterfeit scheme in 1924. The Prince's word was a sufficient guarantee to him that the scheme was all right.

"I am convinced, however, that the scheme was not originated by Prince Ludwig," Raba declared. "The Prince only financed the proposition. The real instigator who must be sought is much higher up."

Cross-examined as to the identity of the "higher up" Raba admitted the Prince himself told him both Premier Count Bethlen and former Premier Count Teleki had participated in the campaign. Raba said he, himself, had no mistakings in joining a plot in which Count Teleki and Police Chief Nadassy participated and which was carried on in a governmental building.

Raba's job was chiefly that of messenger and he also helped in sorting and counting the counterfeit notes in the palace of the

introduced by Viscount Cecil, representing Great Britain, whereby the nonpermanent memberships would be increased from six to nine. This he believed to provide a way where in the Brazilian and Spanish aspirations might be satisfied, as it permits re-eligibility for re-election, thus creating a kind of intermediate member of the Council.

**THREE-YEAR TERMS**  
Under the Cecil project, the Assembly would elect nine nonpermanent members, three for three years, three for two years and three for one year and the elected nations would assume their responsibilities immediately. The plan provides, however, for three-year terms in the future, with one-third of the number elected each year.

In principle, the nonpermanent members shall not be re-eligible until three years after the expiration of their term of membership, but an elected member shall be re-eligible for another term, with understanding that not more than one-third of the nonpermanent members may be declared re-eligible at the same time.

The Cecil plan also provides for proportional representation and its adoption might give an additional seat to Latin America, making three altogether.

## NEW RAIL LINES TO SERVE STATE

Construction of 430 Miles in  
North Approved

California and Eastern  
Oregon in Territory

Three Railroads Affected by  
Commission Decision

(BY A. P. MONT WIRE)  
WASHINGTON, May 11.—Construction of approximately 430 miles of new railroad in Eastern Oregon and Northern California, which would serve the largest area in the United States now without railroad mileage, was given outright and conditional approval today by the Interstate Commerce Commission.

Three railroads would do the building, the territory to be served equalling the combined areas of Massachusetts, Connecticut, New Jersey and Delaware.

At the same time, the commission authorized the Southern Pacific Company to acquire control of the Nevada-California-Oregon Railway by purchase of its common stock; conditionally authorized the same carrier to acquire in like manner the Oregon-California and Eastern Railway, and dismissed the petition of the Oregon Public Service Commission for an order requiring construction of new railroads in interior Oregon.

**PROPOSALS MET**  
The railroad applications were described generally as in substitution for the Oregon commission's proposals as far as "meeting local needs" was concerned.

If all the provisions prescribed were adhered to, all of the proposed construction would not be necessary since existing rights over existing and proposed lines are involved in the conditions. The latter were stipulated, the commission said, in line with the policy of Congress, which recognized the building of unnecessary lines involved a waste of resources and that "competition between carriers may result in harm to the public, as well as in benefit."

Details of construction and the working out of the co-operative arrangements suggested were left to the railroads, and in view of the importance of the whole proceeding, the commission said it expected them to "undertake in good faith the basis of its decision, or to notify it promptly if the terms were objectionable."

**CENTRAL PLANS TWO LINES**  
The Central Pacific Railway, the only one to receive outright authority from the commission, plans to build a line thirty-six miles long from a point on its line two miles south of Klamath Falls, Or., to Cornwell, Cal., and another road sixty-two miles long from Cornwell to Alturas in Modoc county, California.

The Oregon Trunk's new line would run from Bend, sixty-six miles to Paunsa, a station on the recently constructed portion of the Natron cut-off of the Central Pacific, thence across Klamath marsh and along the Williamson River to Sprague River, approximately seventy miles and thence approximately forty-two miles to Klamath Falls.

The road was authorized to build from Bend to a connection with the Oregon, California and Eastern subject to the condition that if it is granted trackage rights over the Southern Pacific between Paunsa and Klamath Falls, it shall construct only to a point of connection with the Natron cut-off.

**THREE BRANCHES PROPOSED**  
The Oregon, California and Eastern proposes to build three branches, one running from its terminus at Sprague River sixty-three miles to Silver Lake; another from a point on the proposed Silver Lake branch along the Williamson River, approximately fifteen miles and the third from Sprague River approximately sixty-five miles to Lakeview.

The authority to the road was conditioned upon the granting by it to the Oregon Trunk of operating rights over its present and projected lines between a point of connection and Klamath Falls, in event the Oregon Trunk failed to reach an agreement with the Southern Pacific for joint operation over its line.

Authorization of the Southern Pacific to acquire control of the Oregon, California and Eastern was conditioned upon consummation of an arrangement under which the Oregon Trunk would be enabled to operate over the Natron cut-off or the line of the Oregon-California and Eastern.

**STATE BOUNDARY CASE  
AFFECTS CLUB'S TITLE**  
INSTITUTION MAY BE LOST TO  
EL PASO THROUGH RULING  
BY MASTER IN CHANCERY

(EXCLUSIVE DISPATCH)  
EL PASO (Tex.) May 11.—A perfectly good country club with golf links, swimming pool and tennis courts may have been lost to El Paso according to local attorneys' opinion on a decision rendered recently by the Master in Chancery who has been hearing the boundary case between landowners in Texas and New Mexico over possession of land in the valley above El Paso.

The El Paso Country Club was built on land presumably owned by Z. T. White, who owns a large tract of land along the Rio Grande just above the city. A golf course was laid out and sodded, tennis courts built and a large swimming pool installed. The property is valued at \$200,000 and is the only country club in the city. According to the opinion of local attorneys, the site of the country club grounds belongs to the State of New Mexico and the New Mexico title held by L. M. Crawford is the valid one and not the one, which is a Texas title, held by White and transferred to the country club, a corporation.

**TO BE LIEUT. NANT-COLONEL**  
(EXCLUSIVE DISPATCH)  
PHOENIX, May 11.—Capt. Emil J. Rorer, U. S. A., assigned as instructor to the One Hundred and Fifty-eighth Infantry, National Guard of Arizona, is to be its lieutenant-colonel, under permission obtained from the War Department. The regiment is commanded by Col. Power Conway.

## THE MAY CO.

New! The Large  
Flop Hats  
\$10

Now the Mode  
of the Moment

First, look at their smartness! Then look at their price! It is significant that The May Company is now showing its second shipment of the ultra new Flop Hats before many stores have received their first—and offer them at a price you would expect only after the style had outworn its popularity.

Sealing Wax Red, Black, White, Natural, Orchid, Wood Brown

Flop hats have taken the fashionable world by storm and certainly make a welcome picture to eyes overtired by a monotony of small hats. Trimmed simply with gros grain bands and cocardes—with many bands decidedly wider than those on smart hats of the very recent past.

(The May Company—MILLINERY—Third Floor)

**When Summer Comes**  
And your furs are ready to be laid away for the season telephone The May Company, Broadway 2940, giving us your own evaluation on your garments. On this we base the rate you are asked to pay.

**The Very Day After**  
our delivery man will call at your door to collect your garments from that moment we assume responsibility for safe keeping.

**Moths are Banished**  
From your furs, when they are placed in our special fumigating vaults for safe keeping. This vault—the only one of its kind in Los Angeles—is specially endorsed by the United States Government.

**Silk Dresses**  
Priced at Only  
\$19.50

Frocks that can proudly take their place with models twice the price! Not just one such dress but dozens of them—in irresistible variety of Style—Color—Fabric. Youth-giving boleros, two-piece frocks, and models with the two-piece theme, are all developed in the very smartest of silk crepes—

Flat Crepes, Polka Dot Crepes, Crepes de China, Georgette, Dumondie Crepes

A group of dark-color office or street frocks are tailored and severely simple—and therefore unusually smart. For more informal hours, you may choose airy lines in silks of Rose, Lamon, Copper Shades or ever-refreshing white. Sizes 34 to 44.

(Women's and Misses Dresses—Third Floor)

**Slenderizing Frocks \$19.50**  
100 New Dresses—bearing the unmistakable marks of Parisian styling. Summer fashions demand gayety—originality of design. And these frocks at \$19.50 fuse these imperative style points with an artful, graceful air of slenderness. Georgette, Crepes, Prints, and novelty sport fabrics in shades of Cocoa, Rose, Powder Blue, Navy and Black. Sizes 42½ to 52½.

(The May Company—SHOP OF LARGER SIZES—Third Floor)

**Special Reduced Prices**  
During the month of May we will relapse fur garments, clean and glass, add new loops and fur buttons, and sew ordinary rips at a great reduction from our usual rates.

(Fur Shop, Third Floor)

## LOS ALTOS

**Jane Novak**  
Tells:  
"Why I Purchased  
a LOS ALTOS HOME"

*Privacy plus Freedom from Needless Responsibility*

I LIKED the Los Altos immediately, the first time I saw it.

"I was charmed by the beauty of these apartments, and the very evident attention given to even the most minute things, which a woman notices at once.

"Then, when I looked beneath the surface I found that the Los Altos in every particular, was as 'good as it looked.'

"I discovered so many wonderful convenience features embodied in the scheme of things, that it seemed as though this apartment had been designed for my very own use.

"In my work, we must have our time free from unnecessary domestic work, since we never know when the call will come to be at the studio. Yet the ordinary apartment, and certainly a hotel, does not afford the privacy you feel you should have.

"The Los Altos gives me just the privacy I like, yet does not burden me with needless responsibility."

The attention of the public is called to the fact that the attractive Los Altos Dining Room is now open, serving Luncheon, Afternoon Teas and Dinner.

DOUBT SHIPPING  
ROW AUTHORITYSenators Debate Power to  
Advise on SalesFurther Meeting Planned to  
Settle ProblemDollar Pleads for Action on  
\$4,500,000 Bid

(BY A. P. MONT WIRE)  
WASHINGTON, May 11.—Senatorial investigation of the sale of the five American-oriental mail liners out of Seattle to the Dollar interests came to a conclusion today with members of the commerce committee which conducted the inquiry in disagreement as to whether they have power to "ad-

vise" the Shipping Board to accept or reject the \$4,500,000 offer for the fleet.  
The committee will meet Thursday in executive session to determine whether it has such authority and, if so, whether it should "advise" the board to go through with the Dollar sale, which the board contends is a closed incident, or to set aside the transaction and reopen negotiations.

In the midst of an argument among committee members as to their authority and future course, William Humphrey, counsel for R. Stanley Dollar, made a plea for speedy committee action. He contended that the actual sale has been consummated and urged that the Dollar interests should no longer be kept in the position of uncertainty in which they have been since their bid of \$4,500,000 for each of the five ships was accepted April 13.

The protest of Pacific Northwest interests opposed to the sale was concluded with the testimony of five more witnesses who contended that the transaction would create a monopoly by the Dollar interests of American shipping in the Pacific.

They also held that the sale was unfair to the Pacific Northwest because most of the Dollar interests were in San Francisco and that the Pacific Northwest group represented by W. B. Keene, former vice-president of the Emergency Fleet Corporation, did not have sufficient time to prepare its April 6 bid of \$4,000,000 a vessel. During the argument over the committee's power, Chairman Jones, Republican, Washington, opposed the sale, said the board might be glad to receive advice from the committee, but Senator Williams, Republican, Missouri, insisted the committee has no power to advise the board in its actions.

**BREWERY OPENED**  
(EXCLUSIVE DISPATCH)  
NOGALES (Ariz.) May 11.—Joseph E. Wise and associates, organized as Cerveceria de Sonora, S. A., have opened a large brewing plant in Nogales, Son., the populace of the two cities being welcomed as guests on the formal opening day. Construction has been in process for about three years.

**COWBOY'S BODY FOUND**  
(EXCLUSIVE DISPATCH)  
NOGALES (Ariz.) May 11.—In the hills near Patagonia has been found the body of Francis Padilla, 50 years of age, a cowboy on the Ashburn ranch. It is evident he had been thrown from his horse with consequent fracture of his skull.

Illinois Barbers  
Urge Statute to  
Curtail Permits

(BY A. P. MONT WIRE)  
AURORA (Ill.) May 11.—The Illinois Master Barbers, in convention today, adopted a resolution calling on the next Legislature to pass a law requiring all applicants for barber licenses to submit evidence that they have "at least an eighth grade education." The legal limitation sought was prompted by a "desire to elevate the profession."

**CHAMPIONS WOMEN AS MOTORISTS**  
(EXCLUSIVE DISPATCH)  
SACRAMENTO, May 11.—While H. Marsh, chief of the State Division of Motor Vehicles, is on record to the effect that the female of the species is not more deadly than the male when it comes to driving an automobile in California, records of the State Department, Marsh said today, show that women motorists have fewer serious accidents and are much more careful than men.

"Women are naturally more cautious than men," declares Marsh. "They make up for their lack of knowledge about motors by taking fewer chances and if they don't always give the correct hand signal, at least they give some sort of signal, which is more than hundreds of men do."

"The women are more careful at crossings and have more respect for dangerous curves. In short, they display more horse sense on the average than men."

Marsh reports that the number of women drivers is increasing rapidly. They now number about 18 per cent of the California drivers, but the motor vehicle chief says that almost one-third of the applications for new drivers' licenses are now received from women.

**WATER SUPPLY NEARS  
MILLION-FOOT MARK**  
(EXCLUSIVE DISPATCH)  
PHOENIX, May 11.—Though the storage in the valley's two reservoirs is approaching 700,000 acre feet, pumping has been resumed by the Salt River Valley Water Users' Association, which now is raising about 1000 acre feet a day from the valley water table. It is expected that about 1,000,000 acre feet will be in storage by summer time, giving assurance against possible drought for several years to come.

In the report of President F. A. Reid, it is stated that the association members soon may expect the wiping out of all water assessments following the filling of the reservoirs and full utilization of the power generated by the Roosevelt, Horse Mesa, Mormon Flat and valley hydro-electric plants.

Excess power has been contracted to the Inspiration Consolidated Copper Company at 6.5 mills per kilowatt hour and to the Phoenix Public Utilities Company at 5.5 mills.

The foundation of the Horse Mesa dam is now completely opened and ready for concrete and the work of construction is about to be started on a large scale. Funds amounting to \$1,700,000 are available for this work.

**FUGITIVE CAPTURED**  
Women Who Escaped From New York Prison Found in Field  
(BY A. P. MONT WIRE)  
SYRACUSE (N. Y.) May 11.—Rain-drenched, hungry and wretchedly cold, Lillian McDowell, the "Cat-eye Annie" of numerous spectacular jewel thefts who escaped from Auburn prison early yesterday, was recaptured at daylight one mile northeast of Weedsport.

She was found in an open field, partly hidden in a pile of weeds and brush which she had collected to protect her from the cold and rain. Still clad in the prison uniform of blue and white gingham, she appeared to have suffered greatly from exposure during her twenty-four hours' flight. She said she walked to Weedsport yesterday, eight miles, without once being challenged.

A farmer living near the spot where she was found saw her leave the road and go into the fields last night and notified the prison authorities.

HOUSE OF RECLUSE  
MAY HIDE TREASUREDETECTIVE CAPTAIN PROM-  
ISES TO MAKE CAREFUL  
SEARCH FOR MONEY

(EXCLUSIVE DISPATCH)  
SAN ANTONIO (Tex.) May 11.—Belief that buried treasure lies beneath the little Frank street house on Rattlesnake Hill occupied by the aged recluse, Chris Engler, until his death, will result in a careful search by police, Detective Captain W. A. Harvey, announces.

After nearly \$2000 in currency and silver had been found, another \$50 was discovered under the floor, Capt. Harvey reported. Paralyzed and unable to admit friends to his sick room, Engler was found by officers who broke into his home. Two days later he died at a local hospital. Only the money cached away in dishes beneath rugs behind pictures and under the floor revealed the man's past life.

**BERLIN COUP  
FRUSTRATED  
BY SEIZURES**  
Political Conspiracy to  
Overthrow Government  
Unearthed by Police

(BY CABLE AND ASSOCIATED PRESS)  
BERLIN, May 11.—Plans for a political coup by organizations of the extreme right are declared to have been discovered by police, who searched the homes of the leaders today and found what are described as "startling proof" of a conspiracy for a political uprising.

Among the material seized, police claim, was a detailed plan for a concentric attack on Berlin. This was found in the possession of one of the leaders.

The head of the sporting organization, "Olympic" Col. Von Leuck, formerly a member of the army, was subjected to a severe examination at police headquarters.

**College Editors  
Expelled Due to  
'Necking' Defense**  
(EXCLUSIVE DISPATCH)  
FOREST GROVE (Or.) May 11.—The current issue of Pacific University Index has been suppressed, the staff members removed and two students expelled from the institution as the result of an article appearing in the university publication. The trouble started when, after 500 copies had been run off the presses, a copy of the edition was handed to Robert J. Miner, acting executive in the absence of President Francis J. Dobbs. Miner at once ordered the press to stop and the staff dismissed. According to custom the retiring staff members selected their successors. The objectionable article was removed from the forms, the copies already run were seized, and the revised paper was published.

The expelled men have announced that they will seek reinstatement. Wart was a theological student.

**"O.D." BLANKETS HELD  
AS MOST SERVICABLE**  
(BY A. P. MONT WIRE)  
WASHINGTON, May 11.—The same old "O. D." blankets, with which millions of young Americans became familiar during the World War, have been found the most serviceable covering for troops on field service by the experimental board at Fort Benning, Ga. The report of the board, which tested blankets of many kinds, said that while those with more wool in their texture were warmer, they are too bulky for doughboys to carry and hold rain water too long.

**CALIFORNIA CONCERN  
LOSES MEXICAN LAND**  
(BY A. P. MONT WIRE)  
NOGALES (Ariz.) May 11.—Advices received here today from Hermosillo, capital of Sonora, Mex., state that the Mexican Federal government has canceled the concession of the Richardson Construction Company of California, a land firm operating in Sonora. The Taqui River Valley holdings of the Richardson company, said to be a \$1,000,000 concern, were forfeited on account of the company's asserted failure to cultivate the property as farm land.

FEDERAL FARM  
AID CRITICISEDOpposes Principle of  
Paternal Control

Agriculture Can Best  
Solve Own Destiny  
States Chamber  
Hears Addresses

(BY A. P. MONT WIRE)  
WASHINGTON, May 11.—Paternal control by the Federal government over agriculture was assailed at the annual meeting of the States Chamber of Commerce today by its president, John L. Lewis.

O'Leary also declared in his address that the field for agricultural progress had been greatly narrowed by a recent decision of the Supreme Court so that there is no room for them to transgress the spirit or letter of the law.

Members of the contrary nature of the law, O'Leary said, "The American agricultural community is not a political party. It is a community of men and women who are engaged in a common enterprise. They are not interested in the politics of the day. They are interested in the future of agriculture."

Commencing with the day of the American farmer, O'Leary said, "The American farmer is not a political party. He is a man who is engaged in a common enterprise. He is not interested in the politics of the day. He is interested in the future of agriculture."

Mr. O'Leary asserted that new farm products have been produced. New farm machinery has been developed. The American farmer is not a political party. He is a man who is engaged in a common enterprise. He is not interested in the politics of the day. He is interested in the future of agriculture."

Through the time comes that the farmer and industries shall find a method to coexist those who are engaged in a common enterprise. He is not interested in the politics of the day. He is interested in the future of agriculture."

CHILD'S TICKETYoungster's Admission Fee  
to Race Track Fixed  
by Height(BY CABLE AND ASSOCIATED PRESS)  
PARIS, May 11.—Officials  
at the Longchamp Race  
Track hereafter will admit  
children according to size,  
not age.At the entrance to the pad-  
dock is a post upon which  
two marks are painted, one  
being thirty-nine inches from  
the ground, the other fifty-  
eight inches. Arriving with  
their parents, each child is  
gauged by these marks.Those under thirty-nine  
inches enter free; those  
standing between the two  
marks will be entitled to half  
the admission fee, and boys  
and girls otherwise will  
pay the full price.\*\*\*\*\*  
members of their trade who do not  
live up to the letter and spirit of  
the properly established code of  
ethics, then we shall have little or  
no reason to fear government in-  
terference.Julius Klein, director of the Bu-  
reau of Foreign and Domestic  
Commerce of the Commerce De-  
partment, in an address, urged de-  
fensive measures in this country  
against foreign price control of es-  
sential raw materials, not only to  
protect the consumer, but to re-  
move an "ominous threat against  
government good will."\*\*\*\*\*  
ACCOUNTS FOR SUPREMACY  
Julius H. Barnes, former presi-  
dent of the chamber, attributed  
America's economic supremacy to  
her possession and development of  
natural resources, habits of indus-  
try and stable, sound government.Installation selling was charac-  
terized as the strategy of bitter  
warfare, with the spirit of jazz eco-  
nomics, by O. H. Cheney vice-  
president of the American Ex-  
change-Pacific National Bank of  
New York. Addressing the domes-  
tic distribution group meeting, he  
said that present-day installment  
selling was born of competition  
and lives and grows by competition  
and "some day it may die off  
through competition.""Installment selling," he added,  
is the recognition—unconscious  
very often—of the fact that high-  
pressure selling competition has  
used up the consumer's dollar and  
that each industry might fight for  
the dollar of next week—and the  
dollar of next year."\*\*\*\*\*  
FAVORS PUBLICITY  
Publicity, as a medium for super-  
vision and regulation, was advocat-  
ed as the most effective cure for  
business evils by J. B. Reynolds,  
president of the Kansas City Life  
Insurance Company, in an address  
before the insurance group meet-  
ing.A common effort by the States  
to bring their supervisory regula-  
tions into some degree of uniform-  
ity, he suggested, "would add sub-  
stantially to the effectiveness of  
supervision and remove any petty  
causes of irritation and friction."More street cars, more busses  
and more private automobiles will  
add to the gravity of the problem  
of congestion in American cities.  
Frank R. Coates, president of the  
American Electric Railway Associ-  
ation, told the transportation  
group."Private automobiles comprising  
80 to 85 per cent of the vehicles  
in the streets in the rush hours,"  
he said, "carry only 15 to 20 per  
cent of the traveling public. These  
facts have brought the suggestion  
that the time is coming when  
there shall have to be a separa-  
tion of the necessary from the un-  
necessary traffic in congested dis-  
tricts."A government hydro-electric  
project in Spain will necessitate  
the construction of nearly 15,000  
miles of high-tension line.HAUGEN'S BILL  
STANDS INTACTFarm Measure Unaltered in  
Fight by FoesAmendments Rejected and  
Leaders GuessingFinal Vote Not Expected  
Before Saturday(BY A. P. MONT WIRE)  
WASHINGTON, May 11.—The  
Haugen price-stabilizing bill with-  
stood first efforts to alter its pro-  
visions as the House moved slowly  
today in its consideration of farm-  
relief legislation.A series of amendments, in or-  
der for the first time, were reject-  
ed, but leaders, still at sea as to  
what the line-up will be on the  
three proposals reported by the  
Agriculture Committee, did not at-  
tach much significance to the ac-  
tion. None of the amendments was  
directed at vital provisions of the  
bill, and less than 100 of the 435  
members took part in the voting.During the amendment stage, the  
House is operating under rules re-  
quiring only 100 on the floor for  
a quorum, and preventing roll-call  
votes on modification proposals.At the outset of today's session,  
the Haugen bill did suffer a re-  
versal, however, when Representa-  
tive Tilson, the Republican lead-  
er, announced his opposition to it.  
He advocated passage of the Tin-  
cher credit measure, which, with the  
Curtis-Aswell commodity market-  
ing proposal, is in position to be  
offered as substitutes to the bill  
sponsored by Chairman Haugen of  
the Agriculture Committee.\*\*\*\*\*  
VOTES DOWN AMENDMENTS  
In rejecting amendments, the  
House voted down 80 to 21, one  
by Representative Borg, Republic-  
an, Ohio, to have members of the  
proposed Federal Farm Advisory  
Council appointed by the Secre-  
tary of Agriculture instead of elect-  
ed by the farm organizations. It  
also rejected another by Represen-  
tative Newton, Republican, Minne-  
sota, to strike out the section to  
establish the council. Both were  
aimed at the provision to be  
reached later to set up a board to  
administer the \$275,000,000 appor-  
portion carried in the bill.Approving the declaration of pol-  
icy in the measure, the House re-  
jected an amendment by Represen-  
tative Black, Democrat, New  
York to make its benefits ap-  
plicable to "all the people" instead  
of "producers of such commodi-  
ties." He considered the latter  
phrase unconstitutional, in that it  
would be class legislation.Two amendments to cut down  
the size of the council and the  
farm board which would be created  
also were voted down.\*\*\*\*\*  
WANTS APPROPRIATION CUT  
During discussion of the bill's  
provisions, Representative Bur-  
ness, Republican, North Dakota,  
suggested the appropriation be cut  
from \$275,000,000 to \$100,000,000,  
with the immediate imposition of  
an equalization fee on the sales of  
all basic agricultural commodities  
except cotton. The measure, as  
written, would defer the fee for  
two years. With these alterations,  
he believed the bill would pass.Representative Williams, Republi-  
can, Illinois, a member of the Ag-  
ricultural Committee, remarked  
that the changes would restore the  
measure to the form in which it  
originally was presented by the  
committee, which later had  
rewritten it in its present  
shape.The House will turn aside from  
farm relief tomorrow to dispose of  
other business, but will resume  
consideration of the agriculture  
bill Thursday and continue with  
them the remainder of the week.  
Indications are that a final vote  
will not come before Saturday, if then.Passenger liners of the large  
ship companies make fourteen  
trans-Atlantic voyages a year,  
while immigrant vessels make only  
four.POSED exclusively by Charles Spere, famous juve-  
nile lead in the late Thos. H. Ince productions.

# PAN WESTERN PROFIT SHOWN

Earnings in First Quarter Equal \$1.62 a Share

Gross Sales in Period Are Given at \$5,424,647

Appreciation in Storage Oil Value Reported Large

Net profit of the Pan-American Western Petroleum Company for the quarter ended March 31, last, after all charges but before depreciation and depletion, amounted to \$1,620,000, equivalent to \$1.62 a share on the \$1,000,000 of common stock outstanding. This is at the annual rate of \$6.48 a share. Net profits of the company in the year ended December 31, last, after depreciation and depletion, aggregated \$5,424,647, equal to \$5.42 a share.

The company's consolidated profit and loss account issued yesterday also shows gross sales in the first three months of this year of \$5,424,647. After the deduction of \$4,804,647 in operating expenses and other costs, profit from operations is shown as \$1,620,000. General and administrative expenses, interest, etc., aggregating \$181,994.83, also are deducted. In figuring the profit for the quarter, no account was taken of the profit of appreciation in value of oil stocks and oil placed in storage prior to the first of the year and carried at cost. It is pointed out in the report that the increase in value of oil placed in storage in the first three months of this year would amount to \$1,194,147. The appreciation in the value of oil placed in storage prior to the first of the year and still figured at cost would be \$11,000,000, it is stated.

The low prices which obtained during January, February and March prompted the accumulation of the stocks. The company's consolidated profit and loss account as of March 31, last, is as follows:

## ALLIS CHALMERS NET EARNINGS DECREASE

NEW YORK, May 11.—Allis-Chalmers reports net profits of \$1,000,000 for the first quarter of 1926 after taxes, depreciation and amortization, against \$1,100,000 for the same period last year. This is equal after preferred dividends to \$3.69 a share on the common compared with \$3.17 a share a year ago. Unfilled orders on March 31 were \$10,757,000. Bookings of new business for the first quarter amounted to \$1,987,617, an increase of \$124,113 over the same quarter of 1925. Bookings for April were \$2,992,000.

# LIVE TOPICS BEFORE BANKS

Method of Electing Federal Reserve Directors Is Questioned; Substitute Proposed

BY EARLE E. CROWE

For the entertainment of the delegates to the annual convention of the California Bankers' Association at Del Monte last night, the month, the bankers of the State are ready to produce at least two live topics, possibly of a controversial nature. As substitutes for the branch banking issue, now removed to Washington, the indications are that the building and loan question and the method of electing directors to the Federal Reserve Bank of San Francisco are matters that will thoroughly engross the convention.

The initiative for the introduction of the Federal reserve topic comes from the San Joaquin Valley, through Group No. 1 of the California Bankers' Association. At their spring meeting last Saturday, this group adopted resolutions recommending that the California Bankers' Association assume the responsibility for the nomination of the Class "A" and "B" directors of the Federal Reserve Bank of this district. The resolution will be presented to the convention for consideration.

## INTEREST LACKING

Under the present system the "A" and "B" directors are elected by the member banks, each of which is entitled to nominate candidates for the office. There is some intimation that leading bankers feel that interest has lagged in the election of the directors and that the easy way out of simply re-electing incumbents has been followed. As these men look at the matter, the practice of rotation in the selection of the directors would yield results that should reflect profitably in the management of the Federal Reserve Bank.

The resolution adopted by the San Joaquin Valley bankers, so it is understood here, is the result of dissatisfaction over the defeat of their candidate for the office of director for one of the Class "B" directorships. The Pacific-Northwest group is naming the director elected, which gives to that region a representative for the lumber industry that it comes before the annual convention. The banking groups and the business interests now responsible for the election of the directors will undoubtedly have some opinions to express.

## NEW FINANCING ANNOUNCED

Pickering Lumber Company Securities to be Offered Here Today; Also Liens of Free State of Anhalt

New financing on the market here today will include an issue of \$7,500,000 Pickering Lumber Company first mortgage 6 per cent sinking fund gold bonds, series "A," and an issue of \$2,000,000 Free State of Anhalt, Germany, 5 per cent external loan gold bonds.

## London Daily Radio

BY ARTHUR W. KIDDY

(Copyright, 1926, by New York World, Inc.)

LONDON, May 11.—Financial markets here today were remarkably firm, especially the government loan 5s. Industrials were also better, with Courtalds at 4-5-8. Good buying was noticeable in British-American Tobacco. Home railways were steady, while rubbers were neglected, but maintained their price levels.

## NEWLY CREATED

The Pickering Lumber Company is a consolidation of all of the Pickering Lumber interests, creating a new corporation with net tangible assets, after deducting all liabilities except the \$1,125,000 of indebtedness, of over \$12,000,000. The consolidation makes the new corporation among the largest complete entities in the field in which it operates. It owns large tracts of standing timber extending over fifty-one miles of distributing yards.

The bonds will be secured by a direct first mortgage on unincumbered timber, having an independently appraised value equal to not less than 100 per cent of the face of the bonds. In addition, assets similarly appraised, making the aggregate security under the mortgage not less than 200 per cent of the principal amount of the bonds outstanding under the mortgage. The property is valued at a minimum value of \$15,000,000, now or soon to be subjected to the lien of the bonds. Included over 2,000,000,000 feet of unincumbered standing timber, having a value as independently appraised of over \$15,000,000.

## ANHALT OLD STATE

The Free State of Anhalt has had political entity for more than 1000 years. It is one of the several states constituting the German Reich, located in the central part of Germany, seventy miles southwest of Berlin, and has easy access to all the important industrial markets. It is one of the centers of the famous German potash deposits, and its deposits of soluble potash minerals are considered the most important in the world.

The state has a well-balanced economic structure, the strength of which lies in the high state of development of land, forest and mines. Approximately 98 per cent of the entire area of the state is under cultivation.

## Motor Vehicle

Output of 1925 of Huge Value

WASHINGTON, May 11.—Production of motor vehicles of all classes last year totaled 4,157,830 with a wholesale factory value of \$2,934,498,639. This was an increase, the Commerce Department reported today, of 6.9 per cent in number and 12.4 per cent in value as compared with 1924, when the last complete year was taken.

Total production by establishments engaged primarily in the manufacture of motor vehicles, exclusive of body, parts and accessories, reached \$2,371,825,868 in 1925, including 6,655,948 passenger vehicles valued at \$2,537,266,148; 13,627 public conveyances worth \$25,454,025; 1186 government and municipal vehicles worth \$10,182,257; 487,970 business vehicles worth \$357,485,239; 5631 trailers worth \$2,449,617, and other products worth \$492,918,149.

# PACIFIC OIL NET EARNINGS GROW

Company Issues Annual and Quarterly Reports

Profits Gain 38 Per Cent in 1925 Over 1924

Income from Holdings Totals \$3,435,669.70 in Year

An increase of 38 per cent was shown in net income of the Pacific Oil Company for the year ended December 31, last, as compared with the preceding year, according to the company's annual report just issued. Net income in the last quarter of 1925 increased 28 per cent, the report also shows.

Net profits for 1925, after all charges including depreciation, depletion and Federal taxes, amounted to \$3,435,669.70, equivalent to \$4.70 a share on the outstanding capital stock, as against \$1,933,765.64, or \$2.40 a share in 1924. This is an increase of \$1,501,904.06, or 77.2 per cent. Net profits in the three months ended December 31, last, were \$4,845,912.25, equivalent to \$12.26 a share, as against \$3,411,650.25 or 97 cents a share in the last quarter of 1924.

Gross earnings from operations in the year were \$22,614,024.17, an increase of \$4,445,082.19, or 45 per cent over the aggregate of \$22,168,941.98 in the year ended December 31, 1924. Gross earnings in the last quarter of 1925 amounted to \$5,935,425.11, as against \$4,439,567.52 in the same three months of 1924, an increase of \$1,495,857.59, or 34 per cent.

For the year 1925 net profit from operations after operating expenses and taxes, was \$1,797,487.52, as compared with \$1,444,445.02, or 24 per cent increase. Net profit from operations in the final quarter totaled \$4,548,970.89, a gain of \$1,147,929.31 over the total of \$3,401,041.58 in the last three months of 1924.

Product company showed an income of \$3,423,469.70 derived from dividends of \$71-3 cents a share each paid January 26, 1925, April 26, 1925, and July 26, 1925, and October 26, 1925 on the stock of Associated Oil Company, and dividends of 55 cents a share paid June 30, and 75 cents a share paid December 31 on the stock of the Milby-Keech Oil Company; also \$40 a share paid December 28 on stock of Associated Oil Company.

Write-off for depreciation and depletion in the year totaled \$2,166,148.17, an increase of \$2,534,008.09 over the preceding year, and a decrease of \$1,000,000 in the corresponding quarter of 1924.

## First Vessel in Service Arrives at Buenos Aires

Steamship West Natus, the first steamer of the Pacific-Argentine line sent from the Pacific Coast by the McCormick Steamship Company, arrived in Buenos Aires on the 10th, thirty days after its departure from Los Angeles Harbor, according to cable news received yesterday by Sam Y. Knight, district manager.

The steamer was met on arrival by tug decorated with American colors in honor of the McCormick service to the North Coast of South America. The McCormick Steamship West Natus will be dispatched on the 15th via the Straits of Magellan for Buenos Aires, Montevideo and Valparaiso. The steamer will call on the 21st for shipments to Havana, Cuba, and Jacksonville, Fla.

## BANKRUPTCY PETITION

Liabilities of \$1,237,500.00 and assets of only \$500 were listed yesterday by R. R. Co. in a bankruptcy petition in United States District Court. The petition was filed by R. R. Co. and its assets are reported and that it holds \$1,237,500.00 in liabilities.

## Gas Prices Stiffen as Demand Gains

LOS ANGELES, May 11.—Gasoline prices here today were steady, with a slight upward trend. The price of gasoline at the retail level was 12.5 cents a gallon.

## CONSUMPTION POINTS TO NEW HIGH

A recovery in gasoline prices corresponding to the increase in demand has improved the technical position of the petroleum industry in the last several weeks, as indicated on the accompanying chart. Consumption is following the same curve that developed last spring when travel by automobile increases and another new high record is indicated. Production shows a more pronounced trend, however, although in recent weeks it has shown a tendency to increase to the high point established last year.

# STEEL BACK LOG SURPRISES

Significance of Drop in Unfilled Orders to Lowest April Since 1910 Discussed by Garrett

BY PAUL WILLARD GARRETT

(EXCLUSIVE DISPATCH)

NEW YORK, May 11.—A steady shrinkage in the steel corporation's forward business since December had prepared the financial community for another drop in April, but few, if any, of the experts expected so large a reduction as now is reported. A \$11,000-ton decline in bookings during that month does not differ greatly, however, from the loss of 444,000 for the same period last year and \$10,000 in the year before.

What interests the business prospects most at the moment is that unfilled orders on the books of the steel corporation have fallen below the 4,000,000-mark for the first time since early last autumn, and actually reveal the lowest back log of future business for any April since 1910. What does the downward trend in the steel curve mean?

Obviously it means, among other things, that buyers have become more and more cautious in their commitments. In part that may be explained by signs here and there of some recession in business activity and in part by their ability to fill all needs through hand-to-mouth buying.

A depression in general business activity is not generally predicted, but the probability of a mild recession in building operations and the emphasis on the part of steel purchasers was bound to be reflected in orders for future delivery.

In the face of a somewhat declining demand for steel and a price level that tends more to sag than rise, buyers do not feel the same urge to make commitments that is felt when trade is good and prices are swinging upward.

Not all of the factors are unfavorable. It so happens that the demand for steel and steel goods has held up and that production has not run dangerously ahead of consumption. Distinctly encouraging is this maintenance of a high rate of consumption for only in that way, perhaps, would we have been able to prevent an accumulation of steel.

That consumption will continue to offset output we have no assurance and, unfortunately, that a shrinkage in the demand will be followed by a contraction in production is a conclusion no commentator can draw at this time. Of late we have had evidences of a disposition to swell production now and then to average down costs of operation and, whereas, steel-plant production in April,

## NEW YORK CURB STOCKS

(BY A. P. NIGHT WIRE)

NEW YORK, May 11.—Further irregularly developed in today's curb market, but a stronger undertone was apparent on the possibility of an early settlement of the British strike. While several inactive issues fell back a point or two, there were no signs of general weakness, although the market drifted lower in sympathy with the heaviness of those issues on the "big board." Trading was in slightly larger volume than yesterday, but still below the daily average of the past two months.

Revelation of speculative interest in the South American issues featured the oil group, which apparently paid no attention to reports of another increase in crude production last week. Large A was in good demand, with buying influenced by reports of the completion of three new wells and expectations of its early transfer to trading on the New York Stock Exchange. Gibson had a temporary sinking spell, but recovered its loss and closed higher on the day. The active members of the Standard Oil group showed only fractional changes. Glen Alden Coal closed 1/4 points higher at 158 despite the action of the directors in postponing semiannual dividend action until the June meeting. Lehigh Valley Coal certificates improved fractionally.

In the motor group Stutz closed a point lower and Rickenbacker touched a new low level for the year. Other changes were fractional and unimportant. Baking shares yielded slightly. General Electric, the most active industrial, showed a slight fractional loss at 78 1/2, with little change taking place in other active industrial shares. Public utilities were practically neglected.

On special transactions, the closing price in United States on the low, and both low and high on the high, were in the neighborhood of 100. Sales High Low Close

## OIL NEWS

BY HOWARD C. KEGLEY

Since the turn of the year, Los Angeles Harbor has exported 34,189,887 barrels of petroleum products, practically all of which originated in the Los Angeles basin.

April heads the list of four months in combined shipments, running up a total of 8,267,193 barrels. March saw 8,255,277 barrels shipped. In February there were 7,702,394 barrels sent out, and in January the exports totaled 8,495,123 barrels.

At the rate petroleum has been going out of this port for the last four months, the year will see more than 100,000,000 barrels exported. Such volume of business would be comparable with last year's petroleum exports, which reached a high mark of about 110,000,000 barrels. Last month's shipments were as follows:

PACIFIC DOMESTIC	1925	1926
Crude	2,294,000	2,294,000
Gasoline	1,000,000	1,000,000
Distillate	1,000,000	1,000,000
Total	4,294,000	4,294,000

PACIFIC FOREIGN	1925	1926
Crude	1,000,000	1,000,000
Gasoline	1,000,000	1,000,000
Distillate	1,000,000	1,000,000
Total	3,000,000	3,000,000

ATLANTIC DOMESTIC	1925	1926
Crude	1,000,000	1,000,000
Gasoline	1,000,000	1,000,000
Distillate	1,000,000	1,000,000
Total	3,000,000	3,000,000

Total	3,000,000	3,000,000

RECAPITULATION	1925	1926
Crude	4,294,000	4,294,000
Gasoline	4,000,000	4,000,000
Distillate	4,000,000	4,000,000
Total	12,294,000	12,294,000

Opens New Area. The probability that the Shell Company has developed the existence of a new field on Poso Creek, eight miles from any previous production, is indicated by the report of the Shell officials yesterday that the well on the south side of Poso Creek, is pumping a net average of about 100 barrels of oil a day with no cost. This report of the Shell officials sets at rest oil-field rumors putting the well's output at from 150 barrels a day with a \$500,000 cost, to 300 barrels a day with a \$500,000 cost.

The Vedder well is down 1922 feet, and is eight miles northwest of the Kern River field, the nearest producing district. It is in the same general area as the George F. Getty, Inc. holdings, which also are being tested with more or less success. The Shell is said to have penetrated about 200 feet of oil-bearing formation.

The Getty interests are drilling the Marland No. 1 at 2195 feet and the Grimes No. 1 at 3365 feet. Both of these wells have been tested, and both have produced water and oil in varying proportions. The Marland well is now plugging back to shut off bottom water, and the Grimes well is cleaning out sand.

Spud New Wildcat. The Union Oil Company spudded its latest wildcat in the Seal Beach district yesterday. The well is on the Bryant property north of the Bryant tract held by the Shell Company, which was surrendered last month after the Shell had drilled four wells on it.

The Union Bryant No. 1 brings the total of present drills in operations at Seal Beach to two. The Marland Oil Company is down about 5500 feet in its Free Bixby No. 1, which is not generally conceded to have much chance for success. The Associated has a foundation in for its fourth prospect well on the Helman ranch, but has not yet built the derrick.

Ready to Pump. Keck & McWhorter are preparing to put their No. 3 well in the northern extension of the Helman Hill field on the pump, according to field reports. This well was almost ruined during the Wilson-Craig-McAlpine blowout and fire, the derrick being destroyed, and the machinery damaged.

A new derrick has been built, new equipment installed, and Keck & McWhorter believe they have a good chance of making the well produce.

## FISHER'S WEEKLY INDEX

Index	Value	Change
1913	100	
1920—May (peak of prices)	247	40.3
1922—January (low)	138	72.5
1923—Average	158	14.4
1924—Average	149.3	87.0
1925—Average	159.3	82.8
1926—Quarterly average	154.2	64.0
1926—April average	150.9	66.3
Week ended May 7	153.3	66.3

Prof. Irving Fisher's wholesale price index of 200 representative commodities and the relative purchasing power of money compared with monthly averages since January, the low in January, 1922, the peak of prices in May, 1920, and the base 100 in 1913 follow:

good chance to make a producer out of the well in spite of its troubles. Bottom is at 4450 feet in the upper zone.

The Keck & McWhorter No. 3 is holding up well, producing about 200 barrels a day on the beam, according to unofficial reports. This well is located at Elm and Thirty-sixth streets.

Henderson Gets Well. The Henderson Petroleum Corporation has completed its No. 10 well in the Los Cerritos district of the Long Beach field, and is getting about 125 barrels a day at a depth of 4735 feet, according to field reports.

Henderson has completed several good wells in this area.

Near Completion. The Barnard Oil Company, whose phenomenal success has been the outstanding feature of operations in the Rossmore field, is preparing to put another well on production on the famous O'Dea property, No. 10, at a depth of 4100 feet, with casing set at 4070 feet, is scheduled for production before the end of the week.

Gets Small Well. The Chaslor-Candfield Midway Oil Company, first to drill producing well in the Torrance field, continues to bring in wells on its great Del Amo tract, and practically all other operators have finished up their drilling programs and are waiting for the completion of pumping. The Chaslor-Candfield's latest completion is the Del Amo No. 88 well, which was drilled to 3487 feet, and brought in on the beam with an initial production of 125 barrels a day. This is somewhat larger in initial output than most of the recent completions at Torrance.

On the Torrance lease, the Chaslor-Candfield company is preparing to bring in its No. 89 well. This project is down 3416 feet with casing set.

Gain Shown in Daily Average Oil Production

NEW YORK, May 11.—The daily average gross crude oil production in the United States increased 3950 barrels for the week ended the 8th inst., totaling 1,994,050 barrels, says the weekly summary of the American Petroleum Institute today. The daily average production east of California was 1,290,000 barrels, an increase of 4900 barrels.

Production	1925	1926
Crude	1,994,050	1,994,050
Gasoline	1,000,000	1,000,000

## GUIDING INSURANCE BUYERS

BY GRIFFIN M. LOVELAKE  
Professor of Insurance, New York University  
This is one of a series of articles appearing in The Times three times a week, dealing with all phases of insurance. The next article will appear on Thursday.

XXVI.—Protecting Your Estate With Automobile Insurance  
In a previous article it was pointed out that, if you are not protected by public liability insurance for the payment of damages for injury to persons and property caused by your automobile, you will be obliged, in case of a judgment against you, to pay the amount out of your own pocket. Examples have been given of heavy payments by uninsured persons, sometimes so large that they impaired seriously or exhausted entirely, the resources of an unfortunate automobile owner.

Recently I talked with a casualty insurance agent who made the point that, except in the case of a millionaire, the amount of coverage for automobile public liability should be at least equal to the inventory value of one's property holdings. He said:

"If a man is worth \$75,000, he should have at least \$75,000 of automobile liability, so that his entire estate would be protected against the payment of large damage claims."

It is astonishing how little the automobile public seems to know of what is going on in the courts trying these liability cases. And what surprises me even more is that the casualty agents do not press more vigorously the necessity for large liability limits. Thousands of thousands of people who are amply able to carry the \$100,000-\$200,000 limit, or more, buy policies for \$5000-\$10,000 limits because they are suggested by the agents themselves.

In a recent article we spoke of the man who thinks he doesn't need liability protection because he is a careful driver. But you may be called upon to pay large damages for an accident caused by your car in circumstances over which you had no control. Although you may not have been able to prevent an accident caused by your car, a judgment may, nevertheless, be rendered against you.

PAYABLE TO WIFE  
Witness the case of a truck and a passenger car which collided and came to a stop on a sidewalk. It was not clearly established who was to blame, but a child struck by the passenger car died and its owner had to pay a large sum as the result of a damage suit. The insurance companies are doing their best to disseminate the truth about the dangers involved in driving uninsured automobiles. Their circulars give lists of authentic cases taken from the thousands of verdicts against motorists for personal injury. We suggest that you obtain copies of such circular

## OBSESSED HOSPITAL DAY

Radio Program Dedicated to  
Florence Nightingale

Annual Review 200 Years  
of Medical Progress

Only Solist Featured in  
Musical Concert

BY PAUL SHERIDY

The anniversary of the birth of Florence Nightingale, celebrated throughout the country as National Hospital Day, was fittingly commemorated last evening from the tower of the radio by a splendid program dedicated to this great nurse who is credited with the establishment of the world's initial hospital as a humanitarian work by the establishment of the first nursing school in the world. L. G. Barnard, superintendent of the Methodist Hospital in Los Angeles, California, presided at the radio, and the program was a fitting tribute to the significance and the progress made in the establishment of the world's first hospital.

THE GROWTH OF HOSPITALS IN THE 19th century was traced in the program, and the address of the day was given by the speaker who showed how the growth of the hospital in the 19th century has been able to keep pace with the growth of the world's population.

THE GROWTH OF HOSPITALS IN THE 19th century was traced in the program, and the address of the day was given by the speaker who showed how the growth of the hospital in the 19th century has been able to keep pace with the growth of the world's population.

## Stars of Mexico Appear Tonight

CARMEN DE BLASCO, SOPRANO

TOMAS MORATO, TENOR

EILEEN JUNE, SCREEN JUVENILE

HARRIET ANDREWS, SOPRANO

Tuesday twilight hours, appearing in her character, "Lullaby Lady." Following the playing of the "Fairland March," by Louis F. Klein, the Court Musician, and the sound of the Sandman's whistle, Queen Titania, and the Guardian of Sleepy-Eye Town whisked Uncle John and Radio land across the Line of Thought, which divides the world we know from the Land of Ought-To-Be.

Their destination was the Fairy Queen Library, and here the Fairy Queen took them into a room, the shelves of which were filled with books devoted to the theme of "Mother."

While this visit was in honor of "Mother's Day," Queen Titania told that every day was a mother's day in Fairyland.

SEVERAL VERSES READ After several verses from these volumes were read the Fairy Queen called Uncle John's attention to

the heavy blue drapes, studded with starlike points of light, which hung at the far end of the room. As they gazed, these curtains parted, revealing a soft, golden glow, in the center of which there appeared the face of a beautiful woman with eyes closed. Slowly the eyes opened and Uncle John seemed to read a message in them. Upon being questioned, Queen Titania explained that this vision was "The Mother of the Ages," but said that she could not interpret the message as this could only be read by each mortal in the eyes of that mortal's own mother.

Closing his eyes to impress the beauty of the vision on his mind, Uncle John opened them again to find they were back in the studio, where, after saying good night, the Radio Fairies vanished from mortal sight as the notes of the waltz rang out on the air.

The defense in the case of George H. Starbuck, former deputy County Assessor, on trial before Judge Keetch on a charge of obstructing justice, was able to present its case yesterday without putting on witnesses. Immediately after Dep. Dist. Atty. Shelley announced the prosecution had finished its case, the defense rested. The case was continued until today for argument.

Starbuck is accused of getting Edmond M. Ardis Jr., Exes. of the New York City owner of a lot at Alamitos Bay. He obtained this. It is charged, for a quiet title deed after clouding title through the juggling of asserted false quiet title

ROLLS-ROYCE

Chassis 165-MK is owned  
by a gentleman

who takes life as it comes

Inspection visit every Rolls-Royce chassis frequently during its entire life

This man lives in Cleveland, Ohio.

At one time, he was concerned in

Now, at middle age, he is retired

from active business. He and his

wife are interested in enjoying

themselves.

His roadster (165-MK) calls for

him at his club to take him golfing

or to the country. He drives it

himself. And he will tell you why.

"Years ago, when I was a little boy,

my first thrill came to me on my

tenth birthday. I was given a

bicycle. Twenty years ago, I sat

behind the wheel of my first motor-

car. That was my second thrill.

Last year, when I bought this Rolls-

Royce and drove it myself, I got

the greatest thrill of my life."

Neither this owner nor his wife

is interested in the impressive me-

chanics of the Rolls-Royce. He

knows that his Rolls-Royce cars

are extremely comfortable; he does

not know that unusually long and

flexible cantilever springs are one of

the causes. He knows that his is a

vibrationless motor-car; he is not

concerned with the reason—a series

of vibration dampers of very effi-

cient design. He can depend upon

the brakes to stop his car quickly

at any speed or to hold it with

security on any descent; that the

Rolls-Royce brake-drums are spun

forgings, machined down from 90

to 30 pounds, having five times the

cooling area of any other brakes,

and lined with a secret composition

which is guaranteed against required

replacement for three years, regard-

less of use or abuse—these things

do not bother him at all.

His Rolls-Royce cars (two en-

closed cars in addition to the road-

ster) are always ready to go, any-

where. And always equal to their

task. In short, this owner is in-

terested in results, not causes.

If you were to call it to his mind,

he would probably remember that

each of his Rolls-Royce cars carries

a 3-year guarantee against failure

of any mechanical part. But since

the guarantees have never been

called in question, he has no rea-

son to remember them. And the

beauty of his Rolls-Royce cars

matches the excellence of their

mechanical performance.

What a reliable servant the Rolls-

Royce has proved to this man and

his wife! What an investment in

comfort and transportation! They

may expect at least 20 years of

unfailing service from their cars.

Can you rightfully ask as much

of your motor-car? If you will

make yourself known at our show-

rooms, we shall be glad to arrange

a 100-mile trial trip in a Rolls-

Royce, at any time, over any roads.

spondents

Sulphur Cream (for external ap-

plication.)

Precipitated sulphur, 3 1-2

drains; White cerate, 2 1-2 drams;

liquid petroleum, 2 ounces; rose

water 1-2 ounce; borax, 18 grains.

We have a pamphlet which goes

into the subject of dandruff, bald-

ness and graying hair. You may

have this by sending a fully self-

addressed, stamped envelope with

your request. (Allow at least two

weeks for receipt of this.)

SHE IS NOT TOO OLD

Mrs. H., aged 41, recently mar-

ried a wonderful man, desired very

much to have a child, and she

wants to know if she is too old

now.

There are a great many women

who do have their first child after

40. Mrs. H., without any particu-

larly long pregnancy, had a fine

time and the difficulty of labor

very just as much with different

women of youthful age, as it does

with women of more mature age.

In general, it is thought that the

labor is more prolonged in the

older women, but this is not nec-

essarily so. In fact, there is no

essential difference in childbirth

between the younger and older

women, if the mothers are healthy

and have had the proper prena-

tal care.

It is always advisable to have a

complete physical examination

with measurements of the pelvis

to be sure that the proportions

are large enough to permit of a

birth of a normal child.

## TOLD TO FIND ANOTHER MAN

Wife Makes Charge Against Hollywood Doctor

Husband Said to Have Taken His Own Advice

Court Asked to Give Decree of Divorce and Alimony Order

Declaring her husband had advised her to "find another man" and that he had acted on the advice and found another woman, Mrs. Adele Elizabeth Hammel yesterday filed suit against Dr. Wesley John Hammel, Hollywood physician. They were married in Wisconsin in 1913 and separated Monday, according to the complaint, which is based on alleged cruelty.

The advice about another man has been given frequently during the past year, Mrs. Hammel said. "With your figure you should find it easy," she quoted him as saying. In January, she said, he feigned a business trip to San Diego; a mysterious message by telephone impelled her to go to Riverside later and she discovered on a hotel register in the familiar handwriting of her husband, his name with the words "and wife" added. She said she accused Hammel of unfaithfulness and he admitted it at once. "I have known her about four months," she said.

The final straw, Mrs. Hammel said, was his action in calling the other woman by telephone and in her presence talking of giving her a radio set and a ring.

Community property of the couple is worth \$75,000, according to the complaint. Mrs. Hammel asserts the physician makes \$15,000 to \$20,000 a year in his practice. She asks alimony of \$500 a month and a suitable fee for her counsel, Maurice C. Spurling.

## JUDGMENT GIVEN FOR LOSS OF TROUSSEAU

Mrs. Hazel Rauhen, who declared her trousseau was lost in a hotel at which she was a guest prior to her marriage, yesterday was awarded judgment of \$100 by Judge Hanby against T. C. Patterson, operator of the hotel. Mrs. Rauhen had sued for \$1000, but was only awarded \$100 under a section of the Civil Code which limits innkeepers to that amount of damage, unless there is a written statement of responsibility given.

## ORATORY FINALISTS SELECTED

Eight Group Victors Compete Friday

All the eight champions who will take part in the Times finals in the National Oratorical Contest on the Constitution have now been selected and preparations are under way for that event, which will take place in Los Angeles on the evening of the 14th inst., and will be the last oratorical battle in this year's contest in the Pacific Southwest.

The last orator to be awarded the honor of a place in the Times finals is William Hamilton of San Diego High School, who won first place at the meeting of Group A in San Diego Monday night. Chandler Ide, representing Redlands

Order of Addresses Announced

Frank B. Noyes, Washington Star Publisher, drawing for order of speakers at national semifinals and finals.

High School, won second place, and Elverson Hopson of Hemet High School, third.

PROGRAM PREPARED

An elaborate program is being prepared for the Times finals, which will be staged at the Los Angeles High School auditorium.

The contest finals in this territory last year, likewise conducted at the Los Angeles High School, were the outstanding school event of the year, and indications at the present time are that this year's finals will be an even more notable affair.

Requests for seat reservations are coming in daily in great number to Director Nichols, and special provisions are being made to take care of an overflow crowd.

A number of inquiries have been received from the public as to the order in which the champions will appear on the program at the finals. This matter was determined several weeks ago in Washington, national headquarters of the contest.

Frank B. Noyes, publisher of the Washington Star and chairman of the American Publishers' Committee for the contest, decided the order of speakers by drawing which gave the order of speakers for each of the seven national semifinals. Under these drawings, the order of the Los Angeles orators at the Times finals will be as follows:

BAUTZER FIRST IN ORDER

The first speaker will be the representative of Group A, Gregson Bautzer of San Pedro High School; second, the Group A champion, William Hamilton of San Diego High School; third, the Group B champion, Lawrence E. Rose of Tucson (Ariz.) High School;

fourth, the Group D champion, William Behnke of Whittier High School; fifth, the Group H champion, Allan Bible of Fallon (Nev.) High School; sixth, the Group F champion, Viola Bauman of Roosevelt High School, Los Angeles; seventh, the Group E champion, Herbert Wenzel of Hollywood High School; eighth, the Group B champion, Harry D. Smith of Bakersfield High School.

On the order for the semifinals, Mr. Noyes also decided the order of the seven speakers for the national finals to take place in Washington on June 4 as follows:

First, the Philadelphia winner; second, the Los Angeles winner; third, the Chicago winner; fourth, the Louisville winner; fifth, the Washington winner; sixth, the Kansas City winner; seventh, the New York winner.

The winners of the first, second and third places in the 1934 finals spoke first, fourth and second, respectively. The winners of the first, second and third prizes in 1933 spoke third, fourth and seventh, respectively.

ASK STREET IMPROVEMENT

The Board of Public Works yesterday reported to the City Council that the board has received numerous requests from property owners for the grading and oiling of the unimproved central sidewalk east of Melrose avenue, from Fairfax avenue to Highland avenue.

The cost of this improvement work will be \$2763, the board said, and recommended that the cost be borne by assessments on benefited adjacent property.

That the course of true love never runs smooth is exemplified anew by the fate which follows the lovers in "The Sin of David," the Stephen Phillips drama which is to have its premiere at the Gamut Theater Monday evening.

It is a colorful costume play of seventeenth-century England, a drama of love and war, passion and tragedy, whose climaxes have seldom been approached by other masters of the spoken word.

The story is historical; the treatment exalted, the text well-nigh perfect in beauty of expression. Lovers of the theater are looking forward to this rare treat.

Mary Isabelle Alpaugh, Noel Leslie and Frank Dawson head the cast. Sol Cohen is composing the music. Fred Butler is the director and Florence Robinson the sponsor for the whole.

Stew and dumplings

Stew all together in a bowl one and one-half cups of flour, one-third teaspoonful of salt and three level teaspoonfuls of baking powder; then, using tip of fingers, work in a bit of butter the size of a hazel nut. Stirring the mixture with a table knife, slowly add about one-half cup of milk to obtain a dough stiff enough to roll out one-half inch thick on a slightly floured board. Shape with fingers into balls.

Prepare and cook beef steaks. Fifteen minutes before the stew is done skim off the fat on top. Arrange the dumplings on top of the stew, separated from each other to allow them to cook evenly. Add salt and pepper to the stew. If there are more dumplings to cook, arrange them on a buttered perforated tin and steam them in a steamer. When the dumplings are to be dropped from a tablespoon, the stew use more milk or less flour.

ORANGE CHARLOTTE RUSSE

Soak two-thirds of an envelope of gelatin in one-third cupful cold water twenty minutes. Boil one-half cupful of water with three-fourths of a cup of sugar until thick. Remove from heat. Add one cupful of orange juice and two tablespoonfuls of lemon juice and cook. As soon as it begins to set place in ice water and beat until light; then fold in three chilled egg whites beaten to a stiff froth. Arrange in a chilled mold lined with lady fingers and chill.

## MAY McAVOY TO CO-STAR WITH RAY

Will Appear in Special Production Based on Work of Firemen

Charles Ray is to be costarred with May McAvoy in "The Fire Brigade," according to announcements made yesterday by official M-G-M studios.

Work on the actual filming of this production is to start in a day or two, under the direction of William A. Wellman.

The acquisition of May McAvoy for the starring feminine role was not anticipated, as it is known that Robert Kane has urged her repeatedly through telegraphic communication to return to New York, the starring role similar to the one she completed there several months ago in "The Sign of the Cross."

However, the eloquence of Hunt Stromberg of the Goldwyn organization coupled with the fact that Miss McAvoy is just finishing the starring feminine role in "The Passionate Quest," which Commodore J. Stuart Blackton is directing for Warner Brothers, influenced her in her decision to remain in Hollywood.

The forthcoming fire picture has been sanctioned and approved by fire chiefs and control boards throughout the country. It is announced, Los Angeles Fire Chief Scott has signified his intention of co-operating to make every detail realistic and for this purpose has proffered the services of several of his companies.

## INFANTRY REGIMENT INSPECTED

Awards Presented Members for Winning Championship in Shooting Matches

Los Angeles Army at Exposition Park was converted into the apex of military enthusiasm last night, when the One Hundred and Sixtieth Infantry, California National Guard, presented itself for inspection by Adj. Gen. Mittelstaedt, here on an inspection tour of National Guard units.

About two-thirds of the organization's 1130 men and officers were on review and aided in the official presentation of medals to members of Company H of Pasadena for winning the national championship in two shooting matches.

Making a score of 2841 out of a possible 3000, a five-man team, competing against other teams throughout the United States, won the annual gallery pistol team championship. Members of the team were: Lieut. F. C. Payne, Sergt. Leslie A. Moss, Sergt. R. E. Booth, and two privates, A. Major and B. Putnam.

Another complaint was directed against Robert Burton Wilcox, Dan Schuler and Rae La Varra, as proprietors of the Screen Players Studio at 641 South Olive street.

The complaint was witnessed by Mrs. Lottie Murphy, 4434 South Gramercy street.

The third complaint named Frederick F. Paul, 1531 Mariposa avenue, who is said to have sent out circulars offering to obtain positions in the large studios for film aspirants.

Miss Ruth Wing, 1555 Council street, named as complainant, is said to have been deceived by Paul's offer.

All the complaints charge conducting employment agencies without a license.

While the charges filed concern only asserted acceptance of fees in return for promises of jobs in motion pictures, the investigation of film "make-up schools" has revealed startling conditions, Levy said.

GIRLS ASKED FOR "DATES"

Girl investigators sent out by the commission, he declared in some instances were subjected to improper attentions, and students were made to "date them up."

As a result of adventures she reported as having taken place at the studio of the Wilcox-La Verne-Schuler organization, a girl, 16 years of age, is being held in the juvenile hall, according to Levy.

Warrants stipulating contributing charges are to be issued today against these men, Levy declared.

The girl, according to her mother, had on a number of occasions been kept at this studio until 1 o'clock in the morning.

Later, when the mother was ill in the hospital, the girl was taken to her home by a man who frequently stayed as late as 4 o'clock in the morning, according to complaints made by neighbors.

Some of the "schools" investigated, Levy said, advertised for men, women and children, saying they were positions for them in pictures.

Applicants learned, he said, they were expected to pay a fee to learn the art of "make-up" without which, they were told, they could not get on in the film. In one instance, Levy said, he was told, a group of Mexicans gave all the money they had.

AGENCIES CO-OPERATE

In the investigation, Levy said, the Better Business Bureau, the Motion Picture Producers' Association, the juvenile authorities, the District Attorney's office and the City Prosecutor's office have been co-operating.

Two of the complaints signed yesterday involve asserted "make-up schools," it is said. The third is directed against an individual who is said to have put out circulars offering to obtain positions for film aspirants.

The investigation of the schools began two months ago, when the Motion Picture Producers' Association, in a letter signed by the secretary, Frederick W. Beaton, forwarded to the State Labor Bureau a complaint against the operations of Paul, Attorney Levy said.

"BOOZE PARTY" HINTED

The Labor Bureau immediately sent an investigator to interview Paul. In her complaint against Paul, Miss Wing said, he immediately endeavored to "date her up on a booze party."

Miss Wing also was sent to interview Wilcox, one of the proprietors of the Screen Players' Studio, and he, she declared, promised to get her a position in a film studio if she would take his course.

The bureau then called to its aid the Better Business Bureau, which had about two years ago been interested in a similar clean-up, and it sent Miss Helen Frick, one of its investigators, to interview Keaton and Wilcox. Miss Frick reported Keaton had made advances to her and that both he and Wilcox had promised to get her employment in the films, but insisted that she take their "make-up" course.

Then Mrs. Lulu B. Lane of the city police department was called to investigate Keaton. She corroborated the findings of Miss Frick.

Considerable interest is being shown in the sale by the Navy Department of the U.S.S. Hancock. The vessel, which was formerly used as a navy transport, is to be sold at public auction.

The ship was built in 1897 by J. Elder & Co., Glasgow, Scotland, and was registered at 1512 tons net and 2577 tons gross. She will be open for inspection by prospective purchasers, commencing the 14th inst.

NEW ACCOUNTING SOCIETY

Southern California Chapter, American Institute of Chartered Accountants, is to be instituted at a dinner at the Alexandria at 5 p.m. tomorrow. The chapter plans to have monthly meetings to be addressed by bankers, business men and others prominent in the accountancy field.

## CITY CLUB TO BAN BALDWIN

(Continued from First Page)

day were featured by discussions of the housing problems confronting the city in industry, with speakers representing Chinese, Japanese, negro, Mexican and American races taking the floor in turn.

The statement by one speaker that in so far as Los Angeles is concerned there is little discrimination in the allocation of recreational facilities was combated strongly by Mrs. Sadie Cole, one of the negro directors of the East Side Home for Dependent Girls, who declared there is only one swimming pool in Los Angeles open to colored people, and this she characterized as "a dirty old plunge far removed from the colored residence district."

A law requiring the publication of notice ten days prior to the granting of any marriage license was included in the social legislation recommended for the state.

The matter was laid before the conference by Orpha Jean Shonta, Los Angeles woman attorney, who also declared that the marriage of minors "should be void, rather than voidable," and that an illegitimate child should be termed a "natural child" in order to protect the child in later life.

Problems of the Community Chest movement, viewed from a social-service standpoint also were discussed.

## PIONEER OIL LAND OWNER HERE DIES

Bernard Nesa, Resident of Los Angeles Thirty-Five Years, Was Ill Weeks

Bernard Nesa, 61 years of age, pioneer oil and business man, died last night at the Angeles Hospital following an illness of several weeks' duration.

Funeral arrangements are pending and will be made by Louis J. Panepa, attorney.

Nesa, who was a native of Switzerland, came to Los Angeles thirty-five years ago. It was on his property at Signal Hill that oil was first discovered by the Shell Oil Company. He had extensive property holdings in Los Angeles and San Diego.

Besides his widow, Mrs. Joseph Nesa, he leaves two daughters, Mrs. Catherine Conterno and Mrs. Nesa, and a son, Bernard Nesa, Jr., all residing at the family home at 1831 Westmoreland boulevard.

Besides his widow, Mrs. Joseph Nesa, he leaves two daughters, Mrs. Catherine Conterno and Mrs. Nesa, and a son, Bernard Nesa, Jr., all residing at the family home at 1831 Westmoreland boulevard.

Besides his widow, Mrs. Joseph Nesa, he leaves two daughters, Mrs. Catherine Conterno and Mrs. Nesa, and a son, Bernard Nesa, Jr., all residing at the family home at 1831 Westmoreland boulevard.

Besides his widow, Mrs. Joseph Nesa, he leaves two daughters, Mrs. Catherine Conterno and Mrs. Nesa, and a son, Bernard Nesa, Jr., all residing at the family home at 1831 Westmoreland boulevard.

Besides his widow, Mrs. Joseph Nesa, he leaves two daughters, Mrs. Catherine Conterno and Mrs. Nesa, and a son, Bernard Nesa, Jr., all residing at the family home at 1831 Westmoreland boulevard.

Besides his widow, Mrs. Joseph Nesa, he leaves two daughters, Mrs. Catherine Conterno and Mrs. Nesa, and a son, Bernard Nesa, Jr., all residing at the family home at 1831 Westmoreland boulevard.

# Substantial British Citizenry Meets Emergency Strike Conditions

IN characteristic British fashion the substantial British citizenry is meeting the crisis brought about by the greatest industrial strike in history in such an effective manner that at the end of the first week conditions in England are greatly improved. Volunteer workmen to replace the striking transportation and dock workers exceed the demand and the transportation and shipping situation has been greatly relieved. Practically all suburban railways are providing skeleton services, while volunteers are manning busses in the city. Food supplies in England are adequate for many weeks, the government announces, with the reopening of Victoria warehouse considerable food supplies are now available. Heavy tanks parked in districts in London with detachments of guards in steel helmets and full equipment are ready to move at notice, and generally the military has the situation in hand. Photos on this page, the latest to be received from England, depict various activities in connection with the strike.

## OUR HISTORY IN PICTURES

407 The Case Of Dred Scott.

by J. CARROLL MANSFIELD

TWO DAYS AFTER THE INAUGURATION OF BUCHANAN, WHEN THE NEW PRESIDENT IN HIS ADDRESS HAD EXPRESSED THE HOPE THAT THE LONG AND BITTER AGITATION OVER THE SLAVERY QUESTION WAS NEARING ITS END, AN EVENT OCCURRED WHICH AGAIN STIRRED UP THE DREADED CONTROVERSY.

THIS EVENT WAS THE DRED SCOTT DECISION OF THE SUPREME COURT (DELIVERED MARCH 6, 1857). DRED SCOTT, A NEGRO SLAVE IN MISSOURI (A SLAVE STATE), WAS TAKEN BY HIS MASTER, AN ARMY SURGEON, TO FREE TERRITORY IN ILLINOIS AND UPPER LOUISIANA (MINNESOTA) IN 1834.

IN 1838, THE SURGEON TOOK SCOTT BACK TO MISSOURI. AFTER THE FORMER'S DEATH, SCOTT SUE HIS MASTER'S WIDOW FOR HIS FREEDOM, CLAIMING HIS RESIDENCE IN A TERRITORY WHERE SLAVERY WAS FORBIDDEN BY THE MISSOURI COMPROMISE HAD FREED HIM.

THE MISSOURI COURTS DENIED HIS CLAIM. MEANWHILE A NEW MASTER, SANFORD BOUGHT SCOTT. AGAIN THE SLAVERY MEN SCOTT TOOK HIM TO FREE TERRITORY. HERE HIS CLAIM WAS AGAIN DENIED.

These daily history strips make a unique pictorial history of America.

Hundreds are clipping them daily and pasting them in scrapbooks.

## JAVA ISLAND ART PRAISED

Arrival Here, Tells of Development

Painter Going Back for Two-Year Stay

George Crook, War Censor, on Way to Bay City

On a lonely island off the south coast of Java, has the finest art collection in the world, according to William Ritschel, Marne, and a veteran member of the Academy, who yesterday announced a two-year journey to the world with palette and brush when he arrived at the local airport aboard the Panama Mail liner, Marne. Mr. Ritschel was one of the 177 passengers disembarking the largest list ever recorded in a Panama Mail liner. To the primitive art of Bali is added completely the ancient art of the early Chinese civilization," declared Mr. Ritschel.

**COLORFUL LIFE**  
When people to visit the people of Java are today living in the primitive days of thousands of years ago, yet they passed, also, the modern period which the world has now reached. We of the world have become civilized and it is because of this that we can never attain the primitive life of the people of Java.

## Heavy Bearing ALFALFA LAND

With Abundant Gravity Water at One of Lowest  
Irrigation Costs of any District in California

In tracts of any size with crops that will yield immediate  
cash income to buyer, offered in disposal sale of immense

## MILLER & LUX

(INCORPORATED)

Holdings in Northern San Joaquin Valley at only

## \$100 to \$300 Per Acre

ON REASONABLE TERMS

THE West Side of the San Joaquin Valley is one of the  
richest farming sections in America. Its wealth is cre-  
ated from its great areas of deep, fertile soil; dependable  
water supply from the High Sierras, ideal climate for field  
and fruit crops and its facilities for quick transportation to  
major markets over paved state highways and  
main lines.

This district is today the most important dairying section

of California, its farmers receiving millions of dollars a year  
from milk products alone. Its trading centers are the modern  
and progressive towns of Los Banos, Gustine, Newman and  
Dos Palos. Its schools are among the best in the United  
States and its residents are progressive and forward-looking  
in community betterment. The climate in this section of the  
valley is pleasant and healthful year around. It is one of  
the finest regions in California in which to live, as well as to  
make money.

### Land Is Selling Rapidly

Probably all of the land available for diversified farming  
in this district, aside from the great Miller & Lux  
holdings, has long ago been highly developed and intensi-  
fically cultivated. The owners are prosperous, and the small  
pieces of land that can be bought from them is held at a  
high price.

The announcement a few weeks ago that Miller & Lux  
were offering for sale thousands of acres of prime farm land  
in this district has resulted in the sale, during the short  
marketing period, of approximately 8,000 acres to farmers  
in large and small tracts. Additional sales are being closed  
rapidly.

This disposal sale of Miller & Lux lands offers an almost  
unprecedented opportunity to acquire the finest type of alfalfa  
and diversified farming acreage at prices that are paid in  
many other sections for raw land of inferior quality that  
lacks many of the advantages in surroundings to be found

here. This is a highly developed district with no pioneering  
problems.

We are offering many unusual bargains in well-located  
tracts of all sizes, either to those who wish to farm or to  
persons seeking the right sort of land investments.

Complete information concerning these lands, with details  
of prices and terms, may be had at any of our offices or by  
mailing the coupon.

panied by his young son, George  
Bates Creel. He will leave to-  
night for San Francisco, where Mr.  
Creel and his son will be joined  
by his wife, known to the stage  
as Blanche Bates.

Mr. Creel laid responsibility for  
the labor strike in England to the  
British government.

"I don't know the immediate  
cause of the strike, but I feel that  
the dole system, established by  
the British government during the  
unemployment crisis, is the basic  
reason for the trouble," Mr. Creel  
said.

"This thing is going to en-  
danger the very foundations of  
the empire, and disrupt the social  
organization of the country be-  
fore it is settled. You cannot feed  
and clothe millions of unemployed  
persons for several

## HELP YOURSELF TO HEALTH

H. K. Kellogg

## The daily treat of more than 10,000,000 people

KELLOGG'S Corn Flakes. Toasted flakes of golden corn. Deliciously crisp and crunchy!

Eat Kellogg's with fruit, milk or cream.

Have them next time on the diner. Order them at cafeterias, hotels and restaurants. Serve them for the kiddies' evening meal.

Kellogg's are the original corn flakes. Full of delicious flavor. Never tough-thick or leathery.

Sold by all grocers everywhere.

**Kellogg's**  
CORN FLAKES

Indigestion cannot bring you such wonder-flavor—such crisp, crunchy flakes. The golden corn flakes have the signature of the originator.

on the package.

## What Makes Home Happy?

FOUR walls can make a house, but it takes a woman to make a home.

The woman who prepares nourishing and attractive meals, does her housework without grumbling, raises a family of healthy boys and girls and still finds time to be a pal to her husband and a friend to her neighbors, is accomplishing the biggest job in the world. Homes like hers—little havens of peace and love—are the bulwark of the nation.

To be a successful homemaker a woman must guard her health. When the mother is not well the home is upset. Women everywhere are learning through their own personal experiences, as Mrs. Riessinger did, the merit of Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound

Mrs. RIESSINGER was in poor health after the birth of her first baby. She weighed only 98 pounds. One day a neighbor told her of Lydia E. Pinkham's Vegetable Compound and she decided to try it. "After taking four bottles," she writes, "I weigh 116 pounds. It has just done wonders for me and I can do my housework without one bit of trouble." Her address is Mrs. M. RIESSINGER, 10004 Nelson Ave., Cleveland, Ohio.

## FRONK CASE NEARING JURY

Sudden Termination of Defense Evidence Causes Sensation at Trial

The case of J. K. Fronk, former "financier" of Hollywood, and his co-defendant, L. A. Landon, banker, will go to a jury of six women and six men in Superior Judge Hahn's court tomorrow afternoon. This was the forecast made yesterday when defense counsel suddenly rested their case without calling Fronk to the witness stand.

In view of the fact that Judge Hahn placed a limit on the arguments to be made to the jury, which will be begun this morning when the trial is resumed at 10 o'clock, the court will start reading its instructions tomorrow at 2 p.m. Each side was given three and one-half hours for argument.

## SURPRISE TACTICS

The announcement from Attorneys W. V. Anderson and Charles Fickert, representing Fronk, that their case was complete after calling but four witnesses, came as a complete surprise to the court and the spectators who had gone to the courtroom in the hopes of hearing Fronk's own story of his sensational financial career as the head of a Hollywood auto finance company.

Anderson announced a last-minute switch in his defense plans which eliminated the calling of Fronk to the witness stand. Witnesses who testified in Fronk's behalf yesterday included Crispian R. Farmer, former vice-president of the National City Bank; F. G. Phillips, public accountant, and a bank teller.

Ruddy refuted testimony of a number of prosecution witnesses to the effect that a master check book issued by Fronk was used to obtain the money which was supposed to be the key to his system and which he could tell at a glance when and where to deposit checks and for what amounts to draw them.

## RULED OUT

The defense sought to prove by Pollock he had warned J. C. Smith, formerly president of the Manchester State Bank, that Fronk was a dangerous man to do business with. The witness stated he had had conversations with Smith about the account prior to that time.

Pollock asserted that a charge of \$77.58 made by his bank against Smith's bank for interest on checks "in float" included all of the checks passing through on the day in question. It was previously shown that the entire amount of the interest was charged to Fronk's account.

The testimony of Phillips was technical and referred entirely to an audit he made of Fronk's account. The most important part of his testimony was that Fronk's account at the Manchester and Manchester State Bank showed a credit balance on December 23, 29 and 30, 1933, the dates involved in the indictment against the two men charging them with grand larceny and embezzlement involving a total of \$22,800.

Landon's attorney, Gerald Myers, completed his case on Monday afternoon. Landon, formerly a Hellman branch bank manager, did not take the stand.

## THEATRICAL SESSIONS TO DRAW MANY

Almost 2000 Expected at June Convention of Film Exhibitors

Elaborate preparations are being made to entertain between 1500 and 2000 delegates to the national convention of the Motion Picture Exhibitors' Association, which will be held in Los Angeles June 1 to 5, inclusive.

In a telegram sent by Sydney S. Cohen, chairman of the board of the M.P.E.A., to Glenn Harper, secretary of the California division of the organization and chairman of the convention committee, the eastern executive states that more than half of the delegates will be accompanied by their families.

A number of special trains and private cars will carry delegates from every State in the Union. Arrangements have been made to establish convention headquarters at the Ambassador.

Headed by Glenn Harper, the convention entertainment committee consists of the following members: B. N. Bernstein, B. H. Lovitt, Fred Miller, J. B. Bernier, A. M. Bowler, Arthur Bernstein, L. L. Bard, M. Gore and Art Myers. Temporary headquarters have been established at Harper's offices in the Figueroa Theater Building, Figueroa and Santa Barbara streets.

## Entrance Date for Chest Help Set at June 1

Los Angeles charity, relief and welfare agencies wishing to apply for the first time for membership in the Community Chest must file their applications with the Chest on or before June 1, according to George M. Babcock, general manager of the Chest.

It will be impossible to consider these agencies for participation in the Chest for the coming year if their applications are not filed before that date, for ample time must be given the budget committee for investigation, Babcock declared.

So successful have been the agencies operating through the Chest budget that every agency in membership during the Chest's first year of operation in this city retained membership and more than a score of new agencies entered in 1933. More institutions have expressed their desire to enter for next year's budget participation.

## DRUG-CASE RULING MAY CURB FIGHT

Federal Judge's Decision Thought to be Handicap in Enforcing Harrison Act

Declaring that where violations of the Harrison Narcotic Act are charged, the government must prove where the drugs in question were purchased, United States District Judge Farrington of Reno, Nev., sitting here in the absence of Judge Henning, yesterday handed down a ruling which Federal narcotic agents believe will force a drastic future change in all Federal narcotic indictments.

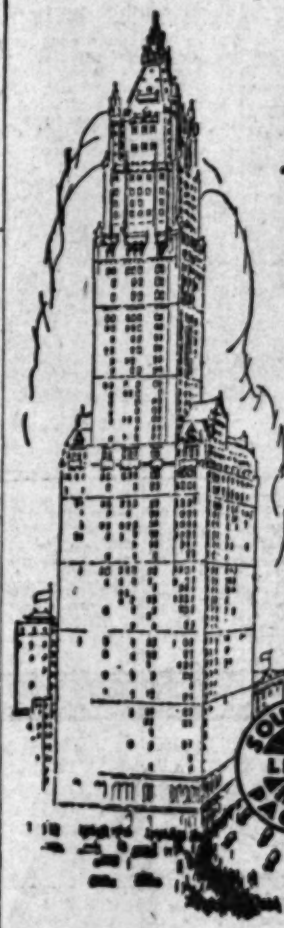

Judge Farrington's decision was rendered in the case of Soe Chung, proprietor of a cafe at 278 South San Pedro street, charged with violations of both the Harrison and the Jones-Miller acts. Inasmuch as the Harrison Act covers both the sale and purchase of drugs, Soe Chung's attorney, David G. Taylor, argued that proof of where his client had purchased the asserted narcotics should be offered before a conviction could be obtained.

Judge Farrington upheld Taylor's contention and dismissed the Harrison Act charges against Chung. The Chinese was found guilty, however, of violating the provisions of the Jones-Miller Act, which involves merely the possession of opium.

In the opinion of many Federal narcotic agents, Judge Farrington's ruling will make it impossible to obtain convictions on any blanket indictments charging violations of the Harrison Act.

WARDE ADDRESSES STUDENTS Frederick Warde, Shakespearean actor, will speak this afternoon at the University of California, Southern Branch, on "Fifty Years of Make-Believe." Mr. Warde will discuss his life work and personal views of his profession. He gave a similar talk to English classes at the institution recently, which proved so popular with students that Dr. Elmhurst, head of the English department, invited him to address the whole student body.

Strange desert formations, granitic, three countries and two oceans—see a hundred new sights on this greatest of all vacations trips this summer.

## Around the United States

—for little more than a roundtrip to New York City

Southern Pacific's "Great Circle Tour"—a roundtrip around the entire United States—for but a few dollars more than the roundtrip direct route fare to New York City. Summer reduced fares in effect May 22 and good until October 1 make it easily available to you. Greatest of all vacations.

From California, down through the gorgeous southland—Arizona's fascinating places, spectacular Apache Trail, Tucson, Phoenix, Casa Grande Ruins, El Paso, San Antonio, Houston in Texas, with sidetrip from El Paso into Old Mexico at Juarez.

New Orleans, city of romance and old-world atmosphere; then by boat for a five-day cruise, down the Mississippi and up the Atlantic coast to New York (meals and berth included in the fare).

Sidetrips to Washington, D.C., and many other eastern cities, world-famous playgrounds; then into Canada and west, or, across New York State to Niagara Falls. Westward again—the Great Lakes, Chicago, Minneapolis and St. Paul, then returning over northern United States.

## Cornelius Vanderbilt, Jr.

First to discover the elusive charm of the new Clicquot Club Pale Dry Ginger Ale were the favored few in whom refinement of taste is a heritage. The exotic flavor of this delicate new drink brought it instant elevation to the peerage of the cuisine.

For a time the supply was limited, but the demand grew too impelling to resist, and now all may enjoy this rare drink, this supremely pure, Ser ginger ale.

## Clicquot Club GINGER ALE

TWO FLAVORS: "PALE DRY" AND "GOLDEN"

C-V.  
Clicquot Club  
Mills, Mass.  
[Continued]  
Kindly send me five cases of Clicquot Club Pale Dry Ginger Ale.  
I should appreciate very much if you could have this delivered to me in time for a dinner I am giving on Armistice Night, for a number of prominent service men in this city.  
Yours very truly,  
Cornelius Vanderbilt, Jr.

## Two flavors to choose from

The delicate, elusive flavor of the new Pale Dry Clicquot has brought it into instant favor. The famous Golden Clicquot is particularly invigorating, a spicy drink, the most popular of all bottled beverages in the nation over. Choose to suit your individual taste; both are equally pure, equally generous in price, and equally reasonable in cost. The Clicquot Club Company, Mills, Massachusetts.

## White Ginger

## TOPS KIDNEY, BLADDER A TROUBLES OR COSTS YOU NOTHING!

There is a remedy containing a gland in conjunction with other powerful ingredients which promptly cleanses the kidneys and bladder, removes all toxins and restores the system to its normal state. It costs you nothing to try it. Can anything be more?—Just that! Can anything be more?—Just that!

# A CHUCKLE FOR EVERYBODY LOCAL LAUGHS

Each week The Times produces a film entitled "Local Laughs," consisting of the fifteen best jokes submitted by local people. Weekly prizes are paid of \$5, \$3, \$1, and twenty of \$1 each. A list of winners showing the film, together with rules for submitting jokes, are given daily in a coupon in The Times. Prize-winning jokes, and names and addresses of winners, appear only on the coupon. Jokes receiving honorable mention will be given a place or honor on The Times coupon page each week-day, and each of these contributors will receive a souvenir of acknowledgment.

New Hand: I have only one request.  
Farmer: What's that?  
New Hand: Please let me stay in bed long enough for the lamp chimney to cool off.  
M. S. Wolcott, 117 Roslyn avenue, Fullerton, Cal.

Restaurant Manager: Had much experience?  
Yes, sir. I was officer's cook two years in the army, and was wounded twice.

Manager (tasting soup the man had made): You're lucky. It's a wonder they didn't kill you.  
Ester Posner, 1517 West Forty-eighth street.

Brown: I understand that Senator Green wanted you to act as his private secretary.  
Simmons: He did, but I wouldn't accept the position because I would have to sign everything "Green per Simmons."  
Florence J. Montgomery, 153 West Ninth street, Claremont, Cal.

Algy's acquiring a mustache.  
"Neath his patrician brow;  
Getting it on the installment plan,  
A little down per week.  
S. Robinson, P. O. Box 174, Pasadena, Cal.

"Why are you late?"  
"A man lost a dollar bill, and there were 100 people looking for it."  
"That's no excuse."  
"I was standing on it."  
S. Robinson, P. O. Box 174, Pasadena, Cal.

Joe: I understand our friend Smith had made a fortune in pen. George: That so? What kind, writing or pig?  
Mrs. Togg, 647 St. Paul avenue.

## Difficult Decisions

Wondering whether or not you're supposed to tip the magnificent personage who carries your bag from the taxi to the hotel door, and if so how much is the least he would not consider beneath notice.

## MAY 12, 1926.—[PART II.] 21

A dark, vertical, textured surface, possibly a book cover or a close-up of a material, with a series of white, circular, perforated holes along the right edge. The texture is grainy and uneven, with some lighter and darker areas. The holes are evenly spaced and appear to be part of a binding or a decorative element.
